

Kelva

A product brief for affiliates: what the app does, who it is for, and how it makes money.

What it is

Kelva is a cycle and hormone literacy app, built around editorial calm and clinical seriousness rather than the pink-and-flower aesthetic that dominates the category. Tracks cycle, symptoms, mood and notes, plus an AI scan layer for medical documents (test results, lab values, hormone panels). Native iOS, available in 5 languages (DE, EN, FR, ES, IT).

Who it is for

Women and menstruating people across all life stages, with an editorial-aware audience: people who buy the kind of brands that are sold at Wundercurves or in *Brigitte Woman*. Creators who sit well: women-health educators, gyno-curious explainers, post-pill journey accounts, perimenopause educators, fertility content with a scientific tone.

Key features

- **Cycle and symptom tracking:** clean log of cycle phase, symptoms, mood, energy, notes. No gamification, no streaks.
- **Editorial design:** paper-flood backdrops, instrument-serif headlines, JetBrains Mono accents - the app looks like a Wallpaper* spread, not a teen tracker.
- **AI document scan (Premium):** photo of a blood-test report or hormone panel, the AI extracts the relevant values, flags out-of-range numbers and writes a short explanation in your language.
- **5-language UI:** DE, EN, FR, ES, IT. Legal pages are DE / EN only, the rest is fully localised.
- **Privacy-first:** no third-party analytics, no ad SDKs, vision-AI runs through a Klar-controlled pipeline.
- **Universal-link sharing:** links into the app open the right detail screen on installed devices, fall back to App Store on cold.

Business model

Single revenue stream, recurring subscription. AI features are gated behind Premium as the differentiator.

Premium subscription

- Price: **6 EUR / month**.
- Free tier: full manual cycle and symptom tracking, 5-language UI, basic insights.
- Premium unlocks: AI document scan, advanced insights, deeper history.

Affiliate compensation

- **28 percent of Premium subscription revenue** for **12 months** of attribution from first paid month.
- **30-day refund holdback** before payout.
- **50 EUR / USD minimum payout**, monthly, via Wise, PayPal or SEPA.
- **DACH-only audience constraint**: §437/§438 BGB is a German-specific consumer-warranty rule; Kelva accepts only EU-region affiliates.

Why this works as an affiliate pitch

The women-health-app category is crowded but creatively flat - most apps look indistinguishable. Kelva's editorial styling is a real conversation piece for creators who care about aesthetics. The AI document scan is a feature most competitors do not have, which gives creators a concrete differentiator to demo. 6 EUR / month at 28 percent = 1.68 EUR per active user per month, compounding for a year per attribution.
