

MyLoo

A product brief for affiliates: what the app does, who it is for, and how it makes money.

What it is

MyLoo is a discreet bathroom-habit and gut-health log. Track stool, food intake, symptoms, and the AI scan layer reads medical documents (lab results, food sensitivity tests) into actionable summaries. Native iOS, privacy-first design, deliberately calm clinical UI rather than the "wellness-influencer" aesthetic.

Who it is for

Health-curious adults dealing with IBS, gut sensitivities, food intolerances, or post-surgical follow-up. Plus parents tracking toddler health, and chronic-condition patients (IBD, coeliac). Creators who sit well: gut-health educators, IBS-day-in-the-life accounts, low-FODMAP food channels, post-gastro-surgery journals, parenting accounts focused on toddler health.

Key features

- **Stool tracking (Bristol scale):** discrete logging with optional photo, the scale tag is what makes the data actually useful to a clinician.
- **Food diary:** log meals, link them to entries to find correlations.
- **Symptom log:** pain, bloating, energy, mood, on a simple scale.
- **AI document scan (Premium):** photo of a blood-test, food-sensitivity report or stool-microbiome report, the AI extracts values, flags relevant ranges, writes a short non-diagnostic summary.
- **Universal-link sharing:** deep-links into the right screen on installed devices.
- **Privacy-first:** no third-party analytics, no ad SDKs, vision-AI runs through a Klar-controlled pipeline. Health data never leaves the user's account.

Business model

Single revenue stream, recurring subscription. AI is the Premium gate.

Premium subscription

- Price: **5 EUR / month**.
- Free tier: full manual logging, basic correlations.
- Premium unlocks: AI document scan, deeper insights, longer history retention.

- **Android: paused** as of 2026-05. Google's health-app policy (Jan 2026 update) requires a registered org account plus D-U-N-S number. Personal-account submissions are blocked at policy review. iOS is the only live channel for now.

Affiliate compensation

- **26 percent of Premium subscription revenue** for **12 months** of attribution from first paid month.
- **30-day refund holdback** before payout.
- **50 EUR / USD minimum payout**, monthly, via Wise, PayPal or SEPA.
- **iOS-only attribution for now** (Android channel paused, see above).

Why this works as an affiliate pitch

Gut-health content has explosive engagement on TikTok and Instagram: the audience is genuinely seeking and willing to try new tools. MyLoo's clinical-calm visual identity is a real differentiator from the wellness-influencer aesthetic that dominates the category and feels untrustworthy to people with real conditions. AI document scan is a feature most competitors do not have, which gives creators a concrete demo moment. 26 percent at 5 EUR/mo across 12 months = 15.60 EUR per fully-attributed user.
