

# Trubel

*A product brief for affiliates: what the app does, who it is for, and how it makes money.*

---

## What it is

Trubel is a group-chat plan coordinator and a 4k photo-album app rolled into one. Friends vote on plans, build trips, share geo-tagged photo albums, and optionally buy a full-resolution 4k download of a memorable album. Native iOS, Y2K-zine visual identity with sticker-collage motifs.

## Who it is for

Group-trip planners, party people, Gen-Z friend-circle leaders. The audience is younger (18-28), heavily TikTok-skewed, with a strong overlap with festival, bachelor-party, and study-abroad accounts. Creators who sit well: friend-group prank channels, festival-vlog accounts, bachelor-party planners, study-abroad lifestyle pages, Stitch-format reaction creators.

## Key features

- **Group chats with plan voting:** propose a plan (restaurant, trip, party), friends vote, the highest-voted plan wins.
- **Geo-tagged photo albums:** every photo carries its location, the album becomes a map plus a timeline.
- **Public feed (proximity-based):** discover public albums from people near you, with up/downvote.
- **4k album purchase (one-time):** buy a full-resolution download of a complete album for ~19 EUR. Use case: post-wedding, post-festival, post-bachelorette - one person buys the high-res memory drop for the whole group.
- **Privacy-first defaults:** albums are private until you publish, location data stays on-device unless you share.
- **Sticker pack:** branded sticker pack ships with the app for cap captures and screenshot edits.

## Business model

Two parallel streams. This is the unusual one.

### Stream 1 - Premium subscription

- Price: **4.99 EUR / month.**
- Free tier: full chat and album functionality with reasonable limits.

- Premium unlocks: unlimited album size, longer history, advanced filters, no watermark on public posts.

## Stream 2 - One-time 4k album purchase

- Price: **~19 EUR per album** (single-purchase, no recurring).
- Use case is event-triggered: someone plans a wedding, festival or bachelor-party, the album fills up across the event, then one person buys the high-res drop.
- High conversion at the right emotional moment (just after the event), low conversion outside that window.

## Affiliate compensation

- **50 percent of Premium subscription revenue** for **24 months** of attribution from first paid month.
- **Share of 4k album purchases** by affiliate-attributed users for the same 24-month window. The share rate is shown on the onboarding calculator.
- **30-day refund holdback** before payout.
- **50 EUR / USD minimum payout**, monthly, via Wise, PayPal or SEPA.

## Why this works as an affiliate pitch

Trubel's dual stream is rare in the consumer app category. The 4k album sale converts hard at emotional peaks (wedding, festival), which is exactly when group-trip content tends to viral. Creators who run festival or bachelor-party content get a natural buy-moment narrative: "post your album, the host gets the high-res drop". 50 percent / 24 months on subs is industry-leading for the entertainment category.
