

Kelva

for consumer / savings / lifehack creators (global, all 5 app languages)

"Connect mail inbox, app parses receipts automatically. Earn from content your audience already needs."

You replied, thank you. This playbook is everything you need to decide whether this is a fit for you, and if so, how to get to real conversions with minimum friction.

Contents: 1. App in 60 seconds · 2. Audience fit · 3. Reel hooks · 4. Stories + carousels · 5. Posting cadence · 6. Conversion math · 7. Tracking model · 8. Onboarding · 9. Dashboard · 10. Brand assets · 11. FAQ · 12. Next steps

1. App in 60 seconds + business model

Kelva is an iOS + Android app that digitally manages receipts, warranties and subscriptions. You connect multiple mail addresses (read-only), incoming mail lands directly in Kelva, gets parsed by AI or a quick manual scan, you classify it (invoice, warranty, sub, contract) and set reminders. The overview holds all receipts, warranties and subs in one place, plus an optional vault for important documents. With household sharing you open a shared family inbox - everyone sees what is going on, priorities are split, nothing falls through the cracks. App shipped in DE / EN / ES / FR / IT.

Why this works

Overflowing inboxes, subs you only notice when they debit, warranty receipts in a shoebox. Three inboxes, no overview - in any country. Kelva is the single place that does all three.

Free vs Premium

- Free: manual receipt entry + photo scan, push reminder 30 / 7 / 1 day before expiry, Snap-to-Done, §438 auto-calculation (DE consumers), manufacturer warranty lookup, household sharing.
- Premium (29.99 USD/year): AI-based email-inbound classification (email scan mode off / warranty-only / all) + advanced family features.
- Free Lifetime Premium for onboarded affiliates (no posting obligation).
- Annual-only pricing - no monthly plan.

2. Audience fit (does your audience match?)

Works well for

- Personal-finance + savings-tip creators worldwide (IG / TikTok, 10k-300k).
- Family-organisation IGers (5k-100k, very high - loyal, engaged).
- Lifehack creators in any of the 5 languages (DE / EN / ES / FR / IT, 30k-500k).
- Consumer-law explainers: lawyer TikTokers (DE: §437 / §438 angle; EN / ES / FR / IT: general consumer-protection angle).
- Small tech reviewers (5k-50k, device-warranty angle).
- Family-mom + parent influencers (10k-200k, inventory pain is real).

Works poorly for

- Crypto / finance speculation crowd (wrong tone).
- Anti-establishment lifestyle (Kelva is fundamentally pro-consumer-protection).
- Pure aesthetic accounts without a practical-life angle.

3. Reel hooks that work

Faceless content (lifehack demos)

- Screen recording "mail in, app parses everything" - 30s app screen only, email inbound pops up, AI classifies, you assign, reminder set.
- B-roll family inbox + voiceover - 45s, B-roll of overflowing mail + receipt shoebox, voice: "order confirmations, warranty mails, subs you forgot, no overview", cut to Kelva dashboard.
- Warranty-deadline explainer (DE-localised: §437 BGB; other markets: "the warranty clock most people miss") - 60s static slide + voiceover, cut to Kelva with auto-calculated deadline.
- Comparison "Excel vs Kelva" - 30s split-screen, left: 47-device Excel nobody maintains, right: Kelva with family inbox + push reminder.
- Claim-letter reveal (DE roadmap feature, tease only) - 20s, "dryer broken - 1 tap -> legally sound §437 letter ready to send" (note: don't promise as immediately available, tease as upcoming).

UGC / your voice (consumer-life authority)

- Lawyer explainer clip - 60s, you in lawyer setting, locale-specific angle (DE: "§437 BGB - three sentences most people don't know"; EN: "the 1-year warranty clock you keep forgetting"). (Lawyers: respect local BORA-equivalent rules, no concrete legal advice in the Kelva context.)
- Family vlog "How I manage our receipts" - 90s, your normal family vlog format, Kelva as 10-second beat, demo household sharing.
- "What happens when your dryer breaks after 18 months" - 75s scenario, without Kelva = receipt search for hours, with Kelva = 3 taps with date + warranty status + next steps.
- Savings-coach persona "How I don't lose 200 EUR / USD / GBP a year" - 60s, "last month I missed an

4. Story + carousel ideas

Story ideas

- Education story: warranty-deadline explainer slide (locale-adapted) + sticker "the clock most people miss" + link sticker.
- Social proof: Kelva dashboard screenshot, caption "this is now our family inbox for everything paper-y".
- Direct ask: selfie story, "1 year Premium with my link" + link sticker.

Carousel ideas (IG)

- "5 apps every household needs" (Kelva on slide 1, no hard sell).
- "How I claimed back a 320 EUR / USD warranty" (case-study carousel, slide 6 = affiliate link).
- "Subscription cleanup: 47 to 12 in one weekend" (process carousel).

5. Posting cadence + best times

Consumer-lifhack audience: highest engagement Sun evening ("plan-the-week") and Wed evening ("midweek-organise"). Lawyer TikTokers: any day, edutainment performs best 7-10pm local time. 1 reel per week is plenty. Stories with link sticker on weekends bring the bulk of conversions.

6. Conversion math (why this pays)

Micro lawyer / consumer-law TikTok (50k followers, 1 reel): 25,000 views x 2% CTR = 500 clicks, 30% install = 150 installs, 8% Premium = 12 subs, 12 months attribution x 29.99 USD x 50% = ~180 USD per reel. Mid-tier savings-tip (80k IG, 1 reel): 40,000 views x 1.5% CTR = 600 clicks, 30% install = 180 installs, 7% Premium = 13 subs, ~195 USD per reel. Macro family-mom (300k IG, 1 carousel): reach 120,000 x 1.2% CTR = 1,440 clicks, 25% install = 360 installs, 6% Premium = 22 subs, ~330 USD per post. Annual pricing means lower per-month math but higher LTV up-front. Consumer-law content has above-average save / share rate which compounds.

7. Tracking model (how it is counted)

- Your link `kelva.space/i/[yourhandle]` works on any platform.
- Android: Google Play install referrer passes handle natively, deterministic.
- iOS warm: Universal Link with handle.
- iOS cold (~99% of creator traffic): signed-token clipboard deferred-deeplink, live-verified via Wavelength.
- On first app open: optional "Invited by @[handle]? Yes / No" confirmer for clean attribution.
- RevenueCat webhook fires on annual Premium purchase, 50% credited (24-month window for renewals).

8. Onboarding (5 minutes)

- Click the personal link from Mail 2 (valid 7 days).
- Land on `kelva.space/affiliate/[your-token]`.
- Fill in: handle, Wise payout details, country (tax docs), billing address.
- Free Lifetime Premium activated on your Kelva account.
- Dashboard at `getklar.org/dashboard` via magic link.

9. Dashboard (what you see)

- Clicks per day / week / month.
- Installs split (Android / iOS-warm / iOS-cold).
- Active Premium subs in your bucket.
- Claimable + paid + carry-over + next payout date + refund holdback pipeline.

10. Brand assets (download)

Logo, app screenshots, warranty-deadline explainer slides (locale-adapted), mail-inbox demo footage and ready-made captions: getklar.org/i/kelva/brand-assets (link goes live with your onboarding mail).

11. FAQ

Which languages and markets does Kelva work in?

App is shipped in DE / EN / ES / FR / IT. The §437 / §438 BGB warranty auto-calculation is a DE-law feature where it applies; the core product (mail-inbox parsing, warranty / receipt / subscription overview, household sharing) works in every market. Affiliates from any country are welcome.

Can I post in English (or ES / FR / IT)?

Yes. Pitch the core product (single place for receipts + warranties + subscriptions, household sharing, mail-inbox parsing). For DE audiences additionally lean on §437 / §438 BGB. For non-DE audiences lean on generic consumer-protection / household-inventory angle.

Lawyer compliance - what can I say?

Educate about consumer-warranty law in general terms (locale-appropriate). Do NOT give specific legal advice through the Kelva context (BORA risk in DE, similar bar-association rules elsewhere). "App calculates the deadline" is fine. "App writes your claim letter" is roadmap, don't promise as live.

Disclosure duty?

Yes. Rev-share = paid recommendation. #ad / #sponsored / IG "Paid Partnership". Local disclosure law applies (FTC in US, UWG §5a in DE / AT, EU AVMSD-derived rules elsewhere).

Flat fee on top?

Mid+ yes, 150-500 USD / EUR per reel. Macro depends on audience-fit, 500-2,000 USD negotiable for clear lifehack / savings-tip / consumer-law creators.

What if Premium pricing changes?

You continue to earn 50% on the then-current price.

12. Next steps

- Questions? Reply directly to Mail 2.
- Want to start? Click the onboarding link from Mail 2, invest 5 minutes, you are live.
- 15-minute intro call? Book a slot via <https://cal.getklar.org/alain/affiliate-intro> (Cal.com). We walk through tracking / payout / content ideas if you want to clarify before onboarding.
