

ThrottleUp

for moto creators and ADV riders

"VIN scan, recall alerts, multi-bike. Earn from maintenance content you already make."

You replied, thank you. This playbook is everything you need to decide whether this is a fit for you, and if so, how to get to real conversions with minimum friction.

Contents: 1. App in 60 seconds · 2. Audience fit · 3. Reel hooks · 4. Stories + carousels · 5. Posting cadence · 6. Conversion math · 7. Tracking model · 8. Onboarding · 9. Dashboard · 10. Brand assets · 11. FAQ · 12. Next steps

1. App in 60 seconds + business model

ThrottleUp is an iOS + Android app for motorcycle maintenance tracking. The VIN scanner pulls make / model / year / engine class live from NHTSA vPIC. Recall integration runs against the NHTSA Recalls API. You set service intervals per bike (mileage + time based), push reminders fire 30 / 7 / 1 day before due. Multi-bike for those with 2+ bikes in the garage. Plus: maintenance log with photo attachments, PDF / CSV export, anonymous public trip-sharing with privacy-cropped routes.

Why this works

The market is empty. RIDEOLGY has 2.2 stars, "Motorcycle Maintenance Log" has 1.9k downloads total. Most riders track in a Word doc or not at all.

Free vs Premium

- Free: 1 bike, 1 riding group with up to 4 members, unlimited maintenance entries, VIN decode, recall lookup, PDF / CSV export, public trip sharing.
- Premium (3.99 USD/month or 24.99 USD/year): unlimited bikes + larger / more riding groups.
- Deliberate strategy: Free is generous (every rider gets in with no friction), Premium is only for heavy riders with 2+ bikes or large groups.
- Free Lifetime Premium for onboarded affiliates (no posting obligation).

2. Audience fit (does your audience match?)

Works well for

- ADV / touring (Itchy Boots style) IG, 50k-500k, high (loyal, maintenance-aware).
- Tech / gear reviewers IG/YT, 100k-1M, high (tool mindset).
- MotoVloggers TikTok/IG, 50k-500k, high (authentic).
- Cafe-racer / custom builders IG, 20k-300k, very high (co-promo via build log).
- EU moto creators IG/TikTok, 5k-50k, high (smaller market).

Works poorly for

- Sport-bike lifestyle TikTok poseur content (low maintenance-content fit).
- Pure scenic-ride accounts without tool / maintenance angle.
- Generic motorsport pages without bike-ownership signals.

3. Reel hooks that work

Faceless content (bike + UI as hero)

- Screen recording "VIN scan in 3 seconds" - 15s, phone over bike, scanner reads VIN, cut to app with make/model/year filled in.
- Garage B-roll with voiceover - 45s, B-roll of garage / tools / bike detail, voice: "I have 3 bikes, I used to track in a Word doc, here's what changed", cut to multi-bike switcher.
- Comparison "RIDEOLGY (2.2 stars) vs ThrottleUp" - 30s split-screen with both UIs.
- Service-log time-lapse - 20s app screen, oil change entry + photo upload + reminder setup + reminder in 30 days.
- Recall popup demo - 10s, push notification "RECALL for your 2021 Yamaha MT-07: brake line defect", cut to recall detail screen with NHTSA link-out.

UGC / your voice (rider trust)

- "How I track maintenance now" - 60s selfie next to bike, "I used to forget oil changes for 4 months, here's what I do now", cut to VIN scan + reminder setup.
- Build vlog with app as 5-second beat - 90s, your normal maintenance vlog, ThrottleUp integrated naturally.
- "POV: you're the guy with 3 bikes" - 30s in garage with multiple bikes, cut to multi-bike switcher.
- Trip recap with app use - 60s ADV / touring recap, 10s beat cuts to app trip summary.
- Cafe-racer build-log reveal - 45s, custom bike + app build log with photos per entry, "complete maintenance doc as PDF for resale".

4. Story + carousel ideas

Story ideas

- Education story: recall notification screenshot + sticker "check yours now" + link sticker.
- Social proof: "my entire maintenance history in 1 PDF" screenshot + link.
- Direct ask: selfie story, "1 month Premium with my link" + link sticker.

Carousel ideas (IG)

- "5 tools every motorcycle owner needs" (ThrottleUp on slide 1, no hard sell).
- "Why your service log matters at resale" (proof-of-care carousel, slide 7 = affiliate link).
- "Recall alerts I would have missed without this app" (problem-to-solution).

5. Posting cadence + best times

Moto-content audience: highest engagement Sat-Sun late morning ("weekend ride planning") and Wed evenings ("midweek maintenance"). 1-2 reels per week is plenty. ADV / touring content peaks late spring through early autumn. Always pair a reel with a 24h story + link sticker.

6. Conversion math (why this pays)

Micro MotoVlogger (15k IG, 1 reel): 9,000 views x 1.8% CTR = 162 clicks, 30% install = 49 installs, 5% Premium = 2-3 subs (Free is generous enough for 1-bike owners), 16 months x 3.99 USD x 50% = ~70-100 USD per reel. Mid-tier ADV rider (80k IG, 1 reel): 50,000 views x 1.5% CTR = 750 clicks, 30% install = 225 installs, 6% Premium = 14 subs, ~450 USD per reel (cap ~675 USD). Macro tech reviewer (300k IG, 1 service vlog): 180,000 views x 1% CTR = 1,800 clicks, 25% install = 450 installs, 7% Premium = 32 subs, ~1,020 USD per vlog (cap ~1,530 USD). Conversion is lower than e.g. Kelva or MyLoo because the Free tier is very generous (1 bike is enough for most). Focus on multi-bike + touring + ADV audiences.

7. Tracking model (how it is counted)

- Your link `throttleup.app/i/[yourhandle]` works on any platform.
- Android: Google Play install referrer passes handle natively, deterministic - once Android is unblocked.
- iOS warm: Universal Link with handle.
- iOS cold (~99% of creator traffic): signed-token clipboard deferred-deeplink, live-verified via Wavelength.
- RevenueCat webhook fires on Premium, 50% credited for 24 months.
- Self-referral blocked. Family / friends through your link are fine.

8. Onboarding (5 minutes)

- Click the personal link from Mail 2 (valid 7 days).
- Choose pay method.
- Activate Free Lifetime Premium on your ThrottleUp account.
- Dashboard at getklar.org/dashboard via magic link.

9. Dashboard (what you see)

- Clicks per day / week / month.
- Installs split (Android / iOS-warm / iOS-cold) once channels are open.
- Active Premium subs in your bucket.
- Claimable + paid + carry-over + next payout date + refund holdback pipeline.

10. Brand assets (download)

Logo, app screenshots, B-roll of VIN scan + recall popup, garage B-roll snippets and ready-made captions: getklar.org/i/throttleup/brand-assets (link goes live with your onboarding mail).

11. FAQ

Free tier is very generous - do I earn anything at all?

Yes, but not on every user. Conversion mix: ~60% stay Free (1 bike, small group), ~40% go Premium when they have 2+ bikes or plan trips for 10+ people. You earn on those 40%.

Can I promote recall content?

Yes, that is the USP. Please do NOT say "increases bike value" as a hard claim - we are a tracking tool, not a valuation service. Say "easier to sell" / "maintenance documentation ready" instead.

Build-log feature for custom builders - available?

v1 has maintenance log with photo attachments. Full build log with step-by-step documentation is V2 phase. Current state is enough for service history + resale proof.

Disclosure duty?

Yes. Rev-share = paid recommendation. #ad / #sponsored / IG "Paid Partnership". FTC / EU / UWG.

Flat fee on top?

Mid+ yes, 200-600 USD depending on reach. Macro 500-2,000 USD only if audience fit is crystal-clear (maintenance content, not posing content).

What if Premium pricing changes?

You continue to earn 50% on the then-current price.

12. Next steps

- Questions? Reply directly to Mail 2.
- Want to start? Click the onboarding link from Mail 2, invest 5 minutes, you are live.
- 15-minute intro call? Book a slot via <https://cal.getklar.org/alain/affiliate-intro> (Cal.com). We walk through tracking / payout / content ideas if you want to clarify before onboarding.
