

On Wavelength

for creators who plan together (sport coach, flatshare, productivity)

"Plan smarter, together. Earn from what you share anyway."

You replied, thank you. This playbook is everything you need to decide whether this is a fit for you, and if so, how to get to real conversions with minimum friction.

1. App in 60 seconds + business model

On Wavelength is an iOS + Android calendar app with two pillars: heatmap voting for group dates (everyone taps when they are free, the app picks the best slot, group chat stays quiet) and a full sport-coach workflow for 8 sports (soccer, volleyball, basketball, handball, hockey, badminton, tennis, running) covering trainings, matches, lineups, live attendance and a drill library.

Why this works

"When works for you?" group chats die quietly. Coaches lose 5 min per session asking "who is not here?". Wavelength replaces both with one tap.

Free vs Premium

- Free: heatmap voting on 1 group up to 4 members, single calendar.
- Premium (~5 EUR/m or ~40 EUR/y): unlimited groups, sport-team workspace (drills, lineups, attendance), season planner.
- Free Lifetime Premium for onboarded affiliates (no posting obligation).

2. Audience fit (does your audience match?)

Works well for

- Amateur sport coaches across the 8 sports + run-club coaches.
- Productivity / calendar creators with a group-coordination angle.
- Flatshare / roommate / family lifestyle accounts (#flatshare, #wgleben).
- Study-with-me + group-study creators.

Works poorly for

- Solo productivity (Notion-template accounts) - Wavelength is a group tool.
- US high-school football (TeamSnap dominates).
- Pro sport coaches (enterprise tools).

3. Reel hooks that work

Sport-coach reels

- "Stop wasting your warmup yelling 'who is not here'" - live attendance demo, 3 players tap-tap-tap.
- "How I plan a full season in 20 minutes" - screen-rec: enter matches, duplicate trainings, import player list.
- "The drill library that saved my Tuesday trainings" - flip through the drill library, build a session in 4 minutes.
- "POV: you are the coach with the group chat from hell" - comedic 50-notification chaos, smash-cut to heatmap.
- "This replaced my whiteboard" - before/after, lineup editor from the bus.

Productivity / flatshare reels

- "The one app my flat actually uses" - show the weekly plan with colour-coded roommates.
- "How we finally find dates as a flatshare" - six screenshots step-by-step.
- "5 apps that saved my coaching season" - Wavelength on slide 1, no hard sell.

4. Story + carousel ideas

Story ideas

- Education story: heatmap screenshot + sticker "THE feature I need most" + link sticker.
- Social proof: team selfie after training, caption "we plan all our sessions here", @onwavelength tag.
- Direct ask: selfie mode, "use my link for 1 month free Premium" (lifetime Premium for you, 1-month trial for your audience).

Carousel ideas (IG)

- "5 apps that saved my coaching season" (Wavelength on slide 1, no hard sell).
- "How we finally find dates as a flatshare" (step-by-step screenshots, slide 6 = affiliate link in caption).
- "Tools every amateur coach needs" (Wavelength + 4 generic tools, you as the trusted voice).

5. Posting cadence + best times

Sport-coach audience: highest engagement Tue + Thu 7-9pm CET (post-training, pre-bed scroll). Sat morning for match-day content. Productivity audience: Mon + Wed 8-10am CET or Sun evening 6-8pm "plan-the-week" mood. Frequency: 1 reel per week is enough for affiliate conversion. 1 story on top with link sticker brings 30-50% of conversions empirically.

6. Conversion math (why this pays)

50% revenue share, 24 months per attributed user. Premium ~5 EUR/m or ~40 EUR/y. Example sport-coach reel (50k followers): 30,000 views x 1.2% CTR = 360 clicks, 40% install = 144 installs, 5% convert to Premium = 7 subs, ~300-400 EUR over 12-24 months from one reel. Example productivity reel (100k followers): 60,000 views x 1.5% CTR = 900 clicks, 35% install = 315 installs, 4% convert = 12 subs, ~360-450 EUR over 12 months. Example drill TikTok (250k): 180,000 views x 0.8% CTR = 1,440 clicks, 30% install = 432 installs, 6% convert = 26 subs, ~1,500 EUR over 12 months from ONE reel.

7. Tracking model (how it is counted)

- Your link [onwavelength.space/i/\[yourhandle\]](https://onwavelength.space/i/[yourhandle]) works on any platform (IG bio, TikTok bio, story sticker, video description).
- Person taps link: we log click + source.
- Person installs: Android uses Google install-referrer (deterministic), iOS warm install uses Universal Link (deterministic), iOS cold install (~99% of influencer traffic) uses a signed-token clipboard deferred-deeplink - proven functional, live verified, no Branch.io.
- Person subscribes to Premium: 50% of net revenue (after Apple/Google cut) is credited to your handle for 24 months from that user's first paid month.
- 30-day refund holdback before any payout becomes claimable (Apple/Google refund window protection).

9. Dashboard (what you see)

- Live at getklar.org/dashboard (magic-link login).

11. FAQ

What if I want Free Lifetime Premium but do not want to post?

Fine. Premium is sent anyway. We never market in your name. Your link stays ready whenever you decide to post.

Can I use the link in multiple posts?

Yes. It is YOUR link, for 24 months per conversion. More posts = more conversions = more payout. No volume cap.

What if I lose interest after 6 months?

We let it rest. Subs that came in during those 6 months continue to be paid out until each user reaches the 24-month mark.

Can I negotiate a flat fee on top?

Yes. Mid-tier creators \$150-800 per post, macros \$800+ (DACH CPMs lower). Rev-share stays on top. Reply to discuss.

What happens if Premium pricing changes?

You continue to earn 50% on the then-current price. If we raise from 5 EUR to 7 EUR, you get 50% of 7 EUR.

Disclosure duty?

Yes, rev-share counts as a paid recommendation. Use #ad / #sponsored / IG "Paid Partnership". Otherwise warning-letter risk for you and us (FTC + EU law).
