

ThrottleUp

VIN-scan motorcycle maintenance tracker with live NHTSA recall alerts and multi-bike support.

What it is

ThrottleUp is an iOS + Android app for motorcycle maintenance tracking. The VIN scanner pulls make / model / year / engine class live from NHTSA vPIC. Recall integration runs against the NHTSA Recalls API. Service intervals are set per bike (mileage + time based), push reminders fire 30 / 7 / 1 day before due. Multi-bike for the 2+-bike garage. Plus: maintenance log with photo attachments, PDF / CSV export, and anonymous public trip-sharing with privacy-cropped routes.

Who it is for

Wrenchers, project-bike owners, custom builders, daily-driver tuners. Audience skews 20-55, ~95% male, deep European motorcycle community plus US restomod scene. Creators who sit well: ADV / touring vlogs (Itchy Boots style), garage-vlog channels, build-thread Instagram pages, cafe-racer / custom-builder accounts, oil-change tutorial creators, MotoVloggers.

Key features

- VIN scanner: make / model / year / engine class pulled live from NHTSA vPIC database.
- Recall integration: live lookup against NHTSA Recalls API, push notification when a recall drops for a registered bike.
- Service interval reminders: per-bike, mileage + time based, push 30 / 7 / 1 day before due.
- Maintenance log with photo attachments: every entry can carry vendor receipt + install photo.
- Multi-bike management (Premium): unlimited bikes + larger riding groups.
- PDF / CSV export: complete maintenance documentation, useful at resale as proof of care.

Business model

- Single revenue stream: recurring Premium subscription.
- Pricing: 3.99 USD / month or 24.99 USD / year.
- Free tier is deliberately generous: 1 bike, 1 riding group up to 4 members, unlimited entries, VIN decode, recall lookup, PDF / CSV export.
- Premium unlocks: unlimited bikes, larger / more riding groups.
- Strategy note: Free is generous so every rider gets in. Premium is for multi-bike garages + larger riding groups, not artificial limits.

Affiliate compensation

- 50% of net Premium subscription revenue for 24 months from each attributed user's first paid month.
- 30-day refund holdback before payout becomes claimable (Apple / Google refund window).
- 50 EUR minimum payout, monthly, via Wise.
- Free Lifetime Premium for onboarded affiliates (no posting obligation).
- Per-handle dashboard with live click/install/sub/earning split, no agency layer.

Why this works as an affiliate pitch

The market is empty. RIDEOLGY (the big-name moto app) sits at 2.2 stars on the App Store, "Motorcycle Maintenance Log" has 1.9k downloads total. Most riders track in a Word doc or not at all. ThrottleUp's VIN scan + live NHTSA recall layer is genuinely a category-of-one feature. The audience (wrenchers + ADV riders) values tools and trusts other riders, so affiliate conversion is high when the creator is authentic - and very low when they are not.
