

Kelva

for consumer / savings / lifehack creators - and what the research says about how to pitch it

"Connect mail inbox, app parses receipts automatically. Earn from content your audience already needs."

You replied, thank you. This is the long-form companion to the email. It walks through what the research says about face-on-camera vs faceless content, then breaks down which path fits your creator archetype.

Contents: 1. App + business · 2. UGC vs faceless - what the research says · 3. Creator types table · 4. UGC strategy · 5. Faceless strategy · 6. Audience fit · 7. Cadence · 8. Conversion math · 9. Tracking summary · 10. Onboarding · 11. Dashboard · 12. Brand assets · 13. FAQ · 14. One last thing

1. App + business in 60 seconds

Kelva is an iOS + Android app that digitally manages receipts, warranties and subscriptions. You connect multiple mail addresses (read-only), incoming mail lands directly in Kelva, gets parsed by AI or a quick manual scan, you classify it (invoice, warranty, sub, contract) and set reminders. The overview holds all receipts, warranties and subs in one place. Household sharing opens a shared family inbox. Shipped in DE / EN / ES / FR / IT.

Why it sells

Overflowing inboxes, subs you only notice when they debit, warranty receipts in a shoebox. Three messes, no overview - in any country. Kelva is the single place that does all three.

Free vs Premium

- Free: manual entry, photo scan, reminders, Snap-to-Done, \$438 auto-calc (DE consumers), manufacturer lookup, household sharing.
- Premium (29.99 USD/year): AI email-inbound classification (off / warranty-only / all) + advanced family features.
- Free Lifetime Premium for onboarded affiliates, no posting obligation.

2. UGC vs faceless - what the research says

Face-on-camera content (UGC) converts higher than faceless content on average. Faceless still works - just differently.

Two findings from peer-reviewed influencer-marketing research are worth knowing. First, Sokolova and Kefi (2020) showed that parasocial interaction - the sense that a creator is a friend you happen to know through your phone - is a strong driver of purchase intent on Instagram and YouTube. Parasocial trust builds fastest when audiences see a face, hear a voice, and watch a person make choices. Second, Lou and Yuan (2019) found that perceived creator credibility (trustworthiness, expertise, attractiveness) directly increases consumer trust in branded content; creator visibility is one of the strongest credibility signals. Industry data from the Influencer Marketing Hub annual benchmarks consistently puts face-on-camera Reels and TikToks at higher engagement than pure screen-recordings, though the gap varies by niche.

The caveat

Faceless has real strengths. When the demonstration is self-explanatory - a tool doing the thing, a satisfying B-roll, a screen-recording that compresses a 20-minute task into 30 seconds - the product replaces the personality. Faceless also scales: lower production cost per post, easier to outsource. The cost is parasocial trust, which means lower conversion per view but often higher reach.

When each path works

UGC fits when your face is the brand (lawyer-TikTok, savings-coach, family-mom influencer), when trust matters more than reach (anything about money and consumer rights). Faceless fits when the mail-inbox-parses-receipt demo is the value (it screen-records cleanly), when you scale output, or when you post under a brand persona.

3. Creator types - which path fits you

Use this table as a first-pass match. Find the row that sounds most like you, see which path (UGC vs faceless) historically converts best for that archetype, and use the hook angles as a starting point. Conversion ranges are realistic for the Kelva niche; your specific audience will move them up or down.

Creator type	Primary path	Best hook angles	Realistic conversion
Lawyer-TikToker (DE: §437/§438)	UGC strong	"The 1 year warranty clock you keep forgetting"; "§437 BGB in three sentences"; reaction-style consumer-rights explainer	2-4% views->install, lawyer trust is very high
Savings / personal-finance	UGC primary	"I missed 280 EUR last month"; "the 5 subs you forgot you pay"; "how I cut my subs from 47 to 12"	1.5-3% in personal-finance niches
Family-mom / parent	UGC primary	"How our family inbox actually works"; "the dryer broke at month 18 - here's what happened"; household-sharing demo with real family	2-4%, family content has very high trust + share rate
Lifhack / faceless TikTok	Faceless	Mail-inbox screen-rec demo; "app turns mail chaos into a list"; warranty-deadline countdown slide	0.5-1.5% per view but high posting cadence scales
Tech reviewer (small, device-focused)	UGC + screen-rec mix	"App that tracks the warranty on every device you own"; receipt-vault tour; reminder-flow demo	1-2% for warranty-conscious audience
Consumer-rights educator (EN/ES/FR/IT)	UGC	Region-specific consumer-protection angle; "the warranty law that protects you nobody told you about"; case-study walk-through	1.5-3% in localised consumer-law niches

4. UGC strategy (you on camera)

Who this fits

You on camera. Lawyer-TikToker in a quiet office. Savings-coach at the kitchen table opening a real bill. Family-mom showing the shared inbox with your actual partner. The product is a 5-10 second beat inside YOUR story. Sokolova and Kefi (2020) found parasocial trust is what moves consumer-rights and money-adjacent audiences specifically.

Hook examples that work

- "I lost 280 EUR last month to an expired warranty" - talking head, your honest tone, then phone showing the deadline screen.
- "§437 BGB - three sentences most people don't know" (DE) or "the warranty clock you keep forgetting" (EN/ES/FR/IT) - lawyer setting, locale-adapted.
- "How our family inbox actually works" - kitchen scene with partner/kids, you opening the shared overview.
- "Subs I didn't know I was paying" - selfie, you scrolling through the sub list, real reaction.
- "The 1-tap claim letter" - tease the roadmap feature, don't promise as live.
- "What happens when your dryer breaks after 18 months" - scenario, without Kelva = receipt search for hours, with Kelva = 3 taps and the deadline status.
- "How I cut my subs from 47 to 12 in one weekend" - process story, Kelva as the cleanup tool.
- "Year-one Kelva: honest review" - straight-to-camera 60s, what works what doesn't.

Format templates

- Talking-head 30s: direct to camera, your honest take, app screen as B-roll behind you.
- Vlog 60-90s: real scenario (a bill arrives, a warranty expires) -> Kelva moment -> outcome.
- Family demo: partner or kids on camera with you, real shared-inbox interaction.
- Case-study carousel narrated: 6-slide IG with your voice on each, last slide = link.
- Reaction style: you discover a sub you forgot about, real reaction caught on cam.

Do / Don't

- Do: vertical, eye-level, natural light. The product is a beat, not the focus.
- Do: name a real receipt / sub / device. Specificity reads as honest.
- Do: put the link in caption AND a story sticker. Money-pain content converts best in stories.

5. Faceless strategy (screen-rec, voiceover, B-roll)

Who this fits

Voiceover + screen-recording + mail-inbox-parses-receipt B-roll. Lifehack-TikToker. Save-with-me overlays. Tutorial carousel creator. You're behind the camera, the mail-inbox parsing does the demo work. Kelva's screen-rec moment (email arrives, AI classifies, reminder set) is unusually clean, which gives faceless creators a real asset.

Hook examples that work

- "Mail in, app parses everything" - 30s pure screen-rec, email arrives, AI classifies, you assign, reminder set.
- "B-roll family inbox + voiceover" - 45s shoebox of receipts + overflowing mail, voice: "order confirmations, warranty mails, vergessene Abos", cut to Kelva dashboard.
- "Excel vs Kelva" - 30s split-screen, left: 47-device Excel nobody maintains, right: Kelva with family inbox + push reminder.
- "Warranty-deadline explainer" - 60s static slide + voiceover, locale-adapted: §437 BGB (DE), 1-year clock (EN), garantie légale (FR), garantía legal (ES), garanzia legale (IT).
- "5 apps every household needs" - Kelva on slide 1, listicle carousel.
- "How I claimed back a 320 EUR warranty" - case-study carousel, slide 6 = affiliate link.
- "Subscription cleanup process" - 60s screen-rec showing the sub overview, the cancel flow, the savings count.
- "Mail-inbox parsing time-lapse" - speed up the AI-classifying-mails demo, ambient music, captions only.

Format templates

- Screen-record demo 20-30s: AI does the classifying on camera, one caption per cut, no narration.
- Tutorial carousel: 6 IG slides, screenshots step-by-step, slide 6 = affiliate link.
- Voiceover narrative 45s: your voice over screen-rec of the mail-inbox-parses-receipt demo.
- Listicle: "5 apps every household needs" with Kelva at #1 or #2, no hard sell.
- Case-study carousel: 6-slide IG telling a warranty-claim story, slide 6 = link.
- Faceless lawyer-explainer: warranty-law slide deck with voiceover, no face on camera.

Do / Don't

- Do: make the demo self-explanatory. If muted with caption off, does the mail-inbox-classify-receipt sequence still read?
- Do: post more often. Lifehack faceless scales - 2-3 posts per week beats 1 polished UGC for reach.
- Do: caption every step in the demo. Sound-off viewing is the default.
- Do: localise the warranty-law angle. §437 for DE, garantie légale for FR, etc. Generic "warranty law" lands soft.
- Don't: fake-enthusiastic narration over the demo. If you don't have IBS-of-receipts pain yourself, stay silent and let the screen-rec carry.
- Don't: skip the link in caption + bio. Faceless has lower CTR per view, so every touchpoint matters.

6. Audience fit

Works well for

- Personal-finance + savings-tip creators worldwide (10k-300k).
- Family-organisation IGers (5k-100k, very high trust + share rate).
- Lifehack creators in any of the 5 app languages (DE / EN / ES / FR / IT, 30k-500k).
- Consumer-law explainers: lawyer-TikToker (DE \$437/\$438 angle; EN/ES/FR/IT consumer-protection generic).
- Small tech reviewers (5k-50k, device-warranty angle).
- Family-mom + parent influencers (10k-200k, real household inventory pain).

Works poorly for

- Crypto / finance speculation crowd (wrong tone for consumer protection).
- Anti-establishment lifestyle (Kelva is pro-consumer-protection at its core).
- Pure aesthetic accounts without a practical-life angle.

7. Posting cadence + best times

Consumer-lifhack audience: highest engagement Sunday evening ("plan-the-week") and Wednesday evening ("midweek-organise"). Lawyer-TikToker: any day, edutainment performs best 7-10pm local time. Family-mom audiences: weekend mornings + Sunday evenings. Frequency: 1 reel per week is enough. Stories with link sticker on weekends bring the bulk of conversions.

8. Conversion math (why this pays)

50% rev share, 24 months per attributed user. Premium 29.99 USD / year. Lawyer-TikToker (50k followers, 1 reel): 25,000 views x 2% CTR = 500 clicks, 30% install = 150 installs, 8% Premium = 12 subs, 12 months x 29.99 USD x 50% = ~180 USD per reel. Savings-tip Mid-tier (80k IG, 1 reel): 40,000 views x 1.5% CTR = 600 clicks, 30% install = 180 installs, 7% Premium = 13 subs, ~195 USD per reel. Family-mom macro (300k IG, 1 carousel): reach 120,000 x 1.2% CTR = 1,440 clicks, 25% install = 360 installs, 6% Premium = 22 subs, ~330 USD per post. Consumer-law content has above-average save and share rates which compound over time.

9. Tracking summary (full walkthrough in the Extended Brief)

Your link [kelva.space/i/\[yourhandle\]](https://kelva.space/i/[yourhandle]) works on every platform. Android uses Google install-referrer (deterministic). iOS warm uses Universal Link (deterministic). iOS cold (~99% of creator traffic) uses our DIY signed-token clipboard deferred-deeplink, live-verified, no Branch.io. RevenueCat fires on annual Premium purchase, 50% credited (24-month window for renewals). 30-day refund holdback before payout becomes claimable. Full walkthrough - including the why-DIY reasoning, the exact webhook -> Wise pipeline, and the security model - is in the Extended Brief PDF.

10. Onboarding (5 minutes)

- Click the personal link from Mail 2 (valid 7 days).
- Land on [kelva.space/affiliate/\[your-token\]](https://kelva.space/affiliate/[your-token]).
- Fill in: handle, Wise payout details, country (for tax docs), billing address.
- Free Lifetime Premium activated on your Kelva account.
- Dashboard at getklar.org/dashboard via magic link.

11. Dashboard (what you see)

- Clicks per day / week / month.
- Installs split (Android / iOS warm / iOS cold).
- Active Premium subs in your bucket.
- Claimable + paid + carry-over + next payout date + refund-holdback pipeline.

12. Brand assets (download)

Logo, app screenshots, warranty-deadline explainer slides (locale-adapted), mail-inbox demo footage and ready-made captions: getklar.org/i/kelva/brand-assets (link goes live with your onboarding mail).

13. FAQ

Which languages and markets does Kelva work in?

App shipped in DE / EN / ES / FR / IT. The §437 / §438 BGB warranty auto-calc is a DE-law feature where it applies; the core product works in every market. Affiliates from any country are welcome.

Can I post in English (or ES / FR / IT)?

Yes. Pitch the core product. For DE audiences additionally lean on §437/§438. For non-DE audiences use generic consumer-protection / household-inventory angle.

Lawyer compliance - what can I say?

Educate about consumer-warranty law in general terms (locale-appropriate). Do NOT give specific legal advice through the Kelva context (BORA risk in DE, similar bar-association rules elsewhere). "App calculates the deadline" is fine. "App writes your claim letter" is roadmap, don't promise as live.

Disclosure duty?

Yes. Rev-share = paid recommendation. #ad / #sponsored / IG "Paid Partnership". Local disclosure law applies.

Flat fee on top?

Mid+ yes, 150-500 USD / EUR per reel. Macro depends on audience-fit, 500-2,000 USD negotiable. Rev-share stays on top.

What if Premium pricing changes?

You earn 50% on the then-current price.

14. One last thing

Honest read: Kelva fits audiences who already think about receipts, warranties or recurring subs. That includes savings-tip creators, family-mom audiences, lifehack TikTokers, and consumer-law explainers. It does NOT fit lifestyle-aesthetic or pure-entertainment accounts where nobody cares whether the dryer warranty just expired. If your audience would shrug at a 280 EUR missed-warranty story, this is not a fit and that's a real answer. Reply to Mail 2 either way.
