

# Trubel

*for creators who plan birthdays, bachelorettes and friend-group events*

*"Drop a QR, all photos collect themselves. Earn from birthday recaps you'd post anyway."*

You replied, thank you. This is the long-form companion to the email. It walks through what the research says about face-on-camera vs faceless content, then breaks down which path fits your creator archetype.

Contents: 1. App + business · 2. UGC vs faceless - what the research says · 3. Creator types table · 4. UGC strategy · 5. Faceless strategy · 6. Audience fit · 7. Cadence · 8. Conversion math · 9. Tracking summary · 10. Onboarding · 11. Dashboard · 12. Brand assets · 13. FAQ · 14. One last thing

## 1. App + business in 60 seconds

Trubel is an iOS + Android app for photo albums with QR-code magic. You host a hangout (birthday, bachelorette, housewarming, flatshare party), generate a QR card, every guest scans + takes photos normally with their phone camera. After the event the app scans your guests' camera roll automatically within the correct time window (optional GPS radius) and collects every photo into one album. App Store live since May 2026 (Apple-approved after 2 reject rounds). Two revenue rails: 5 EUR/m or 30 EUR/y Premium sub PLUS 1.99 USD 4K album consumable.

### Why it sells

"Send me your pics" group chats die in 4 days. Apple Shared Albums require all-iPhone groups + account creation. Trubel's automatic camera-roll scan handles the whole thing without guests installing or uploading anything. Two payout rails on one reel: sub + consumable.

### Free vs Premium

- Free: 3 active albums, 20 photos per album, 4 members per album.
- Premium (~5 EUR/m or ~30 EUR/y): unlimited albums, photos, members + World-Map pin.
- Standalone: 4K-album download 1.99 USD per album (no sub required).
- Free Lifetime Premium for onboarded affiliates.

## 2. UGC vs faceless - what the research says

**Face-on-camera content (UGC) converts higher than faceless content on average. Faceless still works - just differently.**

Two findings from peer-reviewed influencer-marketing research are worth knowing. First, Sokolova and Kefi (2020) showed that parasocial interaction is a strong driver of purchase intent on Instagram and YouTube. Parasocial trust builds fastest when audiences see a face. Second, Lou and Yuan (2019) found that perceived creator credibility (trustworthiness, expertise, attractiveness) directly increases consumer trust in branded content; creator visibility is one of the strongest credibility signals. Industry data from the Influencer Marketing Hub annual benchmarks consistently puts face-on-camera Reels and TikToks at higher engagement than pure screen-recordings, though the gap varies by niche. For Gen-Z party / birthday content specifically, face presence is nearly mandatory - your audience is following the creator personality, not the product.

### The caveat

Faceless still has space in the Trubel funnel. Aesthetic camera-roll-style carousels (the format that doesn't need a face to work) match Trubel's product output directly. A faceless creator can post a real Trubel album as a carousel and let the photos speak. Faceless also scales: more posts per week, lower production cost.

### When each path works

UGC fits when you are the friend group, the bridesmaid, the birthday host. Your face IS the brand for Gen-Z lifestyle content. Faceless fits when the album itself is the asset (camera-roll carousel, slow-motion event recap with no narration), or when you post under a brand handle rather than a personal one.

### 3. Creator types - which path fits you

Find the row that fits you. Conversion ranges are realistic for Trubel's Gen-Z audience; your specific niche moves them up or down. Note: Trubel pays TWICE on a single converted viewer - once on the sub (24 months) and once per 4K-album purchase. The numbers below are sub-only; consumable adds 5-20 events worth of 1.99 USD each over a typical year.

| Creator type                                        | Primary path       | Best hook angles                                                                                               | Realistic conversion                                   |
|-----------------------------------------------------|--------------------|----------------------------------------------------------------------------------------------------------------|--------------------------------------------------------|
| <b>Birthday / bachelorette planner</b>              | UGC strong         | Real bachelorette recap with QR card moment; "how I run birthdays now"; before/after group-chat-vs-Trubel      | 3-5%, very high consumable attach                      |
| <b>College / study-abroad lifestyle</b>             | UGC primary        | Day-in-the-life with the QR on the table; "all photos from one night, one tap"; recap reel of a semester event | 2-4%, repeated events compound                         |
| <b>Camera-roll aesthetic / carousel</b>             | Faceless           | Trubel album as IG carousel; slow-mo recap with photo grid reveal; "the camera roll I didn't have to chase"    | 1-2%, lower CTR but high posting cadence               |
| <b>Festival vlogger</b>                             | UGC + Faceless mix | Festival multi-day album recap; QR on the wristband moment; "these are everyone's photos, not just mine"       | 2-4%, festival audience converts on the consumable too |
| <b>Bachelorette-planner-niche / wedding content</b> | UGC + Faceless mix | Bachelorette-weekend album reveal; "the bride saw 600 photos she never would have"; QR card design unboxing    | 3-5% in wedding niches, very high consumable attach    |
| <b>Meme / Gen-Z humor</b>                           | Faceless           | "POV: every birthday group chat ever"; chaotic photo-request screenshots cut to Trubel; relatable-meme format  | 0.5-1.5% per view but massive reach                    |

### 4. UGC strategy (you on camera)

#### Who this fits

You at the actual event. Birthday host showing the QR card on the table. Bachelorette planner with the bride. College lifestyle creator at the party. Sokolova and Kefi (2020) found parasocial trust is what moves Gen-Z lifestyle conversion - your audience follows you, not the app.

#### Hook examples that work

- "I ran my friend's bachelorette and got every single photo back" - recap reel with you in frame, QR card moment, album reveal.
- "This is how I do birthdays now" - straight to camera, you at the table with the printed QR card.
- "600 photos from a weekend I would have lost" - emotional payoff reel, the bride seeing the album for the first time.
- "POV: hosting a party in 2026" - chaotic happy-host vibes, drop the QR moment in the middle.
- "The QR card I brought to my flatshare housewarming" - kitchen setup, the card, the album after.
- "Why I stopped sending 'send me your pics'" - talking head, your honest take, app demo as B-roll.
- "Three months of using this for every event" - retrospective reel, multiple albums shown.
- "The bride saw photos she never would have" - emotional reel, big moment energy.

#### Format templates

- Recap reel 60-90s: at the event -> QR card moment -> after-event album reveal.
- Talking head 30s: direct to camera, why you stopped chasing photos, app as B-roll.
- POV-style: "POV: hosting a birthday", chaotic warmth, app as the solution.
- Emotional payoff: friend/bride reaction to seeing the full album, soft music.
- Anniversary retro: "6 months of Trubel - every album I made".

#### Do / Don't

- Do: post the actual album content. The photos sell the app.
- Do: name the event specifically. "my flatmate's 26th" reads more honest than "a recent party".
- Do: link sticker on the recap story - Gen-Z taps stickers more than caption links.
- Don't: stage the QR moment artificially. Real-event awkwardness reads better than a perfect set-up shot

## 5. Faceless strategy (screen-rec, voiceover, B-roll)

### Who this fits

Camera-roll-aesthetic creator. IG carousel maker. Slow-motion recap creator. You're behind the camera, the album does the talking. Trubel's product output IS aesthetic photography, so faceless works unusually well - your camera roll is the demo.

### Hook examples that work

- Trubel album as 10-slide IG carousel - caption: "every photo from one night, automatically".
- Slow-mo recap with photo-grid reveal - ambient music, no voice, captions only.
- "Camera roll I didn't have to chase" - silent screen-rec of the album loading, satisfying.
- "POV typing: hosting a party" - hands only, QR generation flow, then album later.
- Time-lapse of guests scanning the QR through the night - top-down on the QR card, blurry party in background.
- Stop-motion: photos sliding into the album one by one.
- ASMR-adjacent: QR scan sounds, gentle music, no voice.
- Tutorial carousel: "How to set up a Trubel album for your event" - 6 slides, last slide = link.

### Format templates

- IG carousel 8-10 slides: photos from a real album, caption tells the story.
- Slow-motion recap 30-45s: ambient music, captions, photos in time-grid.
- Silent screen-rec 20s: QR card -> guest scan -> photos appearing in album.
- Tutorial carousel: 6 slides, step-by-step, slide 6 = affiliate link.
- Time-lapse: party photos compressed into 60 seconds.
- ASMR-adjacent: app interaction sounds layered with subtle music.

### Do / Don't

- Do: use real album photos (with consent). Stock party photos read fake instantly.
- Do: caption every frame. Sound-off carousels are how Gen-Z consumes.
- Do: keep a consistent visual identity (same filter, same font). Faceless brands win on aesthetic.
- Do: link in caption AND IG bio. Faceless has lower CTR so every touchpoint matters.
- Don't: fake-enthusiastic voiceover. If you don't host events yourself, stay silent and let the photos work.
- Don't: use trending TikTok audio as the only hook - sounds rot in 3 weeks and so does the post.

## 6. Audience fit

### Works well for

- Birthday-recap creators (10k-100k, very high engagement Gen-Z).
- Bachelorette / wedding planners (5k-50k, very high consumable attach).
- College / study-abroad lifestyle accounts (20k-200k, repeated events).
- Festival vloggers (20k-300k, multi-day events convert on both rails).
- Camera-roll-aesthetic / minimal-photo IG accounts (faceless brand).

### Works poorly for

- Solo content (Trubel needs the group-event context).
- Audiences over 45 (the QR + camera-roll-scan motion is Gen-Z-native).
- Privacy-purist audiences (the camera-roll scan is opt-in but the concept will scare them).

## 7. Posting cadence + best times

Gen-Z audience: highest engagement Thursday evening 19-22h CET (pre-weekend planning) and Saturday morning 9-11h CET (post-event recap mood). Bachelorette / wedding niche: Sunday evening ("plan-the-week" wedding planning). Festival niche: real-time during festival season. Frequency: 1 reel per event is plenty. Story sequences before/during/after the event with link sticker drive most conversions.

## 8. Conversion math (why this pays)

50% rev share, 24 months per attributed user on subs + 50% on every 4K-album consumable purchase. Premium ~5 EUR/m or ~30 EUR/y. 4K album 1.99 USD/album. Birthday-planner reel (50k followers): 30,000 views x 1.5% CTR = 450 clicks, 35% install = 158 installs, 4% Premium = 6 subs, ~180 EUR over 12 months + 30 consumable purchases at ~5 EUR = ~75 USD = total ~225-250 EUR per reel. Wedding-niche macro (300k IG, 1 carousel): reach 120,000 x 1.2% CTR = 1,440 clicks, 25% install = 360 installs, 5% Premium = 18 subs, ~540 EUR over 12 months + 80 consumables = ~80 USD = ~600+ EUR total. Festival vlogger (200k TT, 1 reel): 100,000 views x 1% CTR = 1,000 clicks, 30% install = 300 installs, 3% Premium = 9 subs + festival audience buys consumable at ~20% rate = 60 consumables = ~60 USD = ~330 EUR.

## 9. Tracking summary (full walkthrough in the Extended Brief)

Your link [trubel.space/i/\[yourhandle\]](https://trubel.space/i/[yourhandle]) works on every platform. Android uses Google install-referrer (deterministic). iOS warm uses Universal Link (deterministic). iOS cold (~99% of creator traffic) uses our DIY signed-token clipboard deferred-deeplink, live-verified, no Branch.io. RevenueCat fires for BOTH the Premium sub AND the 4K-album consumable purchase - 50% credited to your handle for 24 months from each user's first sub purchase, plus 50% on every consumable that user buys (no time cap on consumables). Full walkthrough is in the Extended Brief PDF.

## 10. Onboarding (5 minutes)

- Click the personal link from Mail 2 (valid 7 days).
- Land on [trubel.space/affiliate/\[your-token\]](https://trubel.space/affiliate/[your-token]).
- Fill in: handle, Wise payout details, country (for tax docs), billing address.
- Get your personal tracking link by mail + dashboard unlock.
- Free Lifetime Premium activated on your Trubel account.

## 11. Dashboard (what you see)

- Live at [getklar.org/dashboard](https://getklar.org/dashboard) (magic-link login).
- Clicks, installs (Android / iOS warm / iOS cold), active Premium subs in your bucket, 4K-album consumable purchases per month.
- Claimable EUR + paid EUR + next payout date.
- Per-app funnel with sub-revenue vs consumable-revenue stacked time-series.

## 12. Brand assets (download)

Logo, QR card templates, app screenshots, B-roll footage, colour palette and ready-made caption snippets: [getklar.org/i/trubel/brand-assets](https://getklar.org/i/trubel/brand-assets) (link goes live with your onboarding mail).

## 13. FAQ

### How does the consumable attribute?

RevenueCat fires when a user buys the 4K-album consumable. The webhook looks up the user's attribution row and credits 50% of net consumable revenue to your handle. No time cap on consumables - your audience can buy 4K albums repeatedly and each purchase pays out.

### Do I need to mention the consumable?

Not required. But mentioning "and you can grab a 4K download of the whole album for 2 bucks" often increases the per-event revenue you earn on each converted user.

### What about privacy concerns?

The camera-roll scan is opt-in. Guests scan the QR, the app explains the time + GPS window, they accept or decline. Describe this honestly in posts - over-promising backfires with privacy-conscious viewers.

### Can I use the link in multiple posts?

Yes. Your link, 24 months per converted user on subs, no cap on consumable purchases by attributed users.

### Flat fee on top?

Yes. Mid-tier creators \$150-800 per post, macros \$800+. Rev-share stays on top. Reply to Mail 2 to discuss.

### What if Premium pricing changes?

You earn 50% on the then-current price for both rails.

## 14. One last thing

Honest read: Trubel fits creators whose content already centres on group events - birthdays, bachelorettes, festivals, study-abroad, flatshare. If your content is solo creator-stuff (single-room study, solo travel, single-person aesthetic), this is not a fit and that's a real answer. We'd rather have 20 well-fit Gen-Z creators than 200 random ones. Reply to Mail 2 either way.
