

My Yarn Stash

for knitting and crochet creators - and what the research says about how to pitch it

"Photo of the yarn label in, app extracts everything, matches with Ravelry patterns from your stash. Earn from what you already share."

You replied, thank you. This is the long-form companion to the email. It walks through what the research says about face-on-camera vs faceless content, then breaks down which path fits your creator archetype.

Contents: 1. App + business · 2. UGC vs faceless - what the research says · 3. Creator types table · 4. UGC strategy · 5. Faceless strategy · 6. Audience fit · 7. Cadence · 8. Conversion math · 9. Tracking summary · 10. Onboarding · 11. Dashboard · 12. Brand assets · 13. FAQ · 14. One last thing

1. App + business in 60 seconds

My Yarn Stash is an iOS + Android app for hobby knitters and crocheters. Photograph the yarn label, AI extracts material, yardage, needle recommendation, manufacturer and colour. The app then matches Ravelry patterns you can actually knit with YOUR stash. Plus: project tracking, FO logbook (finished objects), pattern-match history, and group sharing for knit circles. App Store live since May 2026 (Apple-approved).

Why it sells

Ravelry's mobile app is dead since the 2020 redesign. 10M+ knitters without a native solution. My Yarn Stash fills the gap with AI auto-fill that nothing else has.

Free vs Premium

- Free: 30 yarn items, 1 group up to 5 members, manual entry + photo scan, pattern-match search.
- Premium (4.99 USD/m or 29.99 USD/y): unlimited stash, unlimited groups / members, AI pattern-match recommendations, advanced project tracking.
- Free Lifetime Premium for onboarded affiliates, no posting obligation.

2. UGC vs faceless - what the research says

Face-on-camera content (UGC) converts higher than faceless content on average. For knitting and crochet specifically, face-on-camera AND hands-on-yarn perform best because the audience trades on craft authenticity.

Two findings from peer-reviewed influencer-marketing research. Sokolova and Kefi (2020) showed that parasocial interaction drives purchase intent on Instagram and YouTube; in craft niches this matters disproportionately because craft audiences follow makers, not aesthetic accounts. Lou and Yuan (2019) found that perceived creator credibility (expertise, trustworthiness) directly increases consumer trust in branded content; for knitting/crochet, demonstrated skill and visible stash are the credibility signals. Influencer Marketing Hub benchmarks consistently put craft and hobby verticals at higher UGC engagement than e-commerce or lifestyle.

The caveat

Faceless has a genuine place in craft content. Hands-on-yarn POV (no face, just the work) is one of the most consumed formats in fibre arts - think Knot Stitch's hands-only YouTube channel as the archetype. Stash-tour reels and finished-project carousels also work faceless because the yarn and the project are the aesthetic. The crocheting / knitting community is particularly receptive to faceless creators because hands and projects are 'the personality' in this niche.

When each path works

UGC fits when YOU are the maker, the dyer, the pattern designer. Your voice and your craft visibility are the brand. Faceless fits when hands and yarn carry the show (hands-on-yarn POV, stash tour, project flat-lay), or when you teach (stitch tutorials, AI auto-fill demo).

3. Creator types - which path fits you

Find your row. For knitting and crochet specifically, two rails matter - the sub conversion AND the Awin shop attach. Some creator types convert weak on subs but strong on shop, others the reverse. The expected-conversion column is sub-only; Awin is additive.

Creator type	Primary path	Best hook angles	Realistic conversion
Pattern designer (independent)	UGC strong	"What's in my designer's stash"; pattern-design process with stash; "the app I use to plan my designs"	3-5% on subs, very high Awin attach (designers buy yarn constantly)
KnittingTok / CrochetTok creator	UGC + Faceless mix	Yarn label scan demo; stash-tour with the app overlaying details; project-match reveal; "I finally know what I have"	2-4% on subs, moderate Awin (TikTok audience attaches less than IG)
Indie yarn dyer	UGC	"Dyeing a colourway, here's how my customers track it"; stash-organisation showcase; dyer-to-knitter workflow	2-4% on subs, very high Awin attach (their audience IS the buyer)
Stash-tour / fibre-festival recap	Faceless or UGC mix	Stash tour with app-scan overlay; festival haul with label-scan reel; pattern-match-from-haul demo	1.5-3% on subs, very high Awin (audience buys yarn after seeing yours)
Finished-project carousel creator	Faceless	FO carousel with app's yardage data in caption; project log time-lapse; stash-to-FO journey	1-2% on subs, moderate Awin
Granny-square / starter content	UGC + Faceless mix	"Granny square but make it stash-aware"; beginner stash setup; "my first scan and what it found"	1.5-3% on subs (beginner audience)

4. UGC strategy (you on camera)

Who this fits

You with your yarn. Designer at your desk with WIPs. Dyer in your studio. Stash-tour host with your physical shelves. The audience can tell within 2 seconds whether you actually own and use the yarn on screen. Sokolova and Kefi (2020) findings apply double-strength to craft - knitters follow makers, not aesthetic accounts.

Hook examples that work

- "What's in my designer's stash and what the AI thinks I should knit" - desk shot, you scanning labels, pattern-match reveal.
- "I scanned my entire stash and here's what I found" - emotional payoff, stash-blindness solved.
- "My fibre-festival haul, every label scanned" - haul reel with app moment.
- "How I plan my next design" - designer process vlog with the app as the stash-reference tool.
- "As an indie dyer, this is what I tell my customers to use" - dyer-to-knitter authority play.
- "What I learned scanning 200 labels" - pattern-discovery story, app as the data tool.
- "My stash before and after the AI" - before/after reveal, organisation payoff.
- "Three months of using this - honest review" - straight to camera, what works what doesn't.

Format templates

- Designer desk vlog 60s: stash scan -> pattern match -> next-project tease.
- Talking head 30s: direct to camera, your honest take, app as B-roll.
- Haul recap: fibre festival or yarn-shop visit -> scan-everything sequence.
- Dyer authority: "why my customers use this app", with your yarn featured.
- Stash-tour with app: walk through your shelves, app overlays the data.
- Project storyline: scan-to-pattern-match-to-FO multi-post arc.

getklar.org

Do / Don't

- Do: use your real stash. Stock yarn footage is identifiable in 2 seconds by knitters.

5. Faceless strategy (screen-rec, voiceover, B-roll)

Who this fits

Hands-on-yarn POV. Stash flat-lay. Finished-project carousel. Top-down craft shots. Knot Stitch-style hands-only YouTube. You're behind the camera, your hands and your yarn carry the message. Fibre-arts is unusually faceless-friendly because the work IS the demonstration.

Hook examples that work

- Top-down stash scan demo - phone scanning labels, app screen on the right.
- Hands-on-yarn stash organisation time-lapse with app moments.
- Silent FO carousel - finished project + caption with app yardage data.
- Voiceover-only walkthrough: hands working, your voice teaching the workflow.
- ASMR-adjacent: yarn-handling sounds + scanning beats, no voice.
- Stop-motion: yarn balls organising themselves into the app categories.
- Tutorial carousel: "How to use the AI label scan" - 6 IG slides.
- Time-lapse: 60 seconds from "shelves of unknown yarn" to "organised stash".

Format templates

- Hands-on-yarn POV 60s: workflow with app interaction beats.
- Top-down phone screen-rec 30s: scan-pattern-match sequence.
- Voiceover-only tutorial: hands working, your voice teaching.
- Tutorial carousel: 6 IG slides, screenshots step-by-step.
- ASMR-adjacent: yarn handling + app interaction sounds, soft music.
- Stash-tour time-lapse: 60 seconds compressed shelf-walk with app overlay.

Do / Don't

- Do: real yarn only. Stock yarn footage is detected immediately by knitters.
- Do: caption every step. Sound-off viewing is normal in craft content.
- Do: keep ambient sound (yarn rustle, needle clicks). Reads as honest, not produced.
- Do: link in caption + bio. Faceless craft accounts have moderate CTR - every touchpoint matters.
- Don't: fake-enthusiastic voiceover. If you don't actually knit, stay silent and let hands work.
- Don't: skip the FO logbook moment. Finished-project carousels with yardage data in caption are the killer faceless format.

6. Audience fit

Works well for

- Independent pattern designers (5k-100k, very high engagement + Awin attach).
- KnittingTok / CrochetTok creators (10k-300k, AI demo is unusually screen-rec friendly).
- Indie yarn dyers (already trusted by stash collectors).
- Stash-tour reel makers (5k-50k, very passionate audience).
- Finished-project carousel creators (FO carousels with yardage data perform).
- Granny-square / beginner-friendly creators (broader reach, lower sub but valid Awin).

Works poorly for

- General DIY / craft accounts without dedicated yarn focus.
- Aesthetic-only fibre content (the slow-motion yarn-petting that doesn't actually knit).
- Non-knitting handicraft (sewing, embroidery - wrong stash app).

7. Posting cadence + best times

Craft audience: highest engagement Sunday morning 8-11h local time (planning-the-week craft session) and Wednesday evening 19-21h (midweek-craft mood). KnittingTok: any day, weekend mornings peak. Pattern designers post in arcs: design announcement -> process snippets -> finished sample -> pattern release. 1 reel per week is plenty in fibre arts. Story sequences during fibre festivals or designer-pattern drops drive strong conversion.

8. Conversion math (why this pays)

50% rev share on Premium subs (24 months) + Awin shop commission share on every yarn purchase from referred users (24 months). Premium 4.99 USD/m or 29.99 USD/y. Independent pattern designer (40k IG, 1 reel): 18,000 views x 2.5% CTR = 450 clicks, 35% install = 158 installs, 6% Premium = 9 subs (~135 USD/year) + Awin attach: 30% of installs become yarn buyers, 47 buyers x average 3 baskets/year x ~5 USD commission share = ~700 USD/year Awin. Total ~835 USD/year from one reel. CrochetTok mid-tier (100k TikTok, 1 reel): 50,000 views x 1.5% CTR = 750 clicks, 30% install = 225 installs, 4% Premium = 9 subs (~135 USD) + Awin attach: lower-buyer rate on TikTok audience, 25% buyer-rate = 56 buyers x 2 baskets/year x 4 USD = ~450 USD. Total ~585 USD/year. Indie yarn dyer (10k IG, 1 carousel): 4,000 views x 4% CTR = 160 clicks, 50% install (high trust) = 80 installs, 8% Premium = 6 subs (~90 USD) + Awin attach: very high buyer rate (these are buyers already), 60 buyers x 5 baskets/year x 5 USD = ~1,500 USD/year. Total ~1,590 USD/year - designers and dyers have the highest LTV in fibre.

9. Tracking summary (full walkthrough in the Extended Brief)

Your link [yarnstash.app/i/\[yourhandle\]](https://yarnstash.app/i/[yourhandle]) works on every platform. Android uses Google install-referrer (deterministic). iOS warm uses Universal Link (deterministic). iOS cold (~99% of creator traffic) uses our DIY signed-token clipboard deferred-deeplink, live-verified, no Branch.io. RevenueCat fires on Premium purchase, 50% credited for 24 months. Awin postback fires on every yarn purchase by referred users - affiliate share of the commission credited to the same handle for 24 months. Full walkthrough including the dual-rail Awin attribution is in the Extended Brief PDF.

10. Onboarding (5 minutes)

- Click the personal link from Mail 2 (valid 7 days).
- Land on [yarnstash.app/affiliate/\[your-token\]](https://yarnstash.app/affiliate/[your-token]).
- Fill in: handle, Wise payout details, country (tax docs), billing address.
- Get your personal tracking link by mail + dashboard unlock.
- Free Lifetime Premium activated on your My Yarn Stash account.

11. Dashboard (what you see)

- Live at getklar.org/dashboard (magic-link login).
- Clicks, installs (Android / iOS warm / iOS cold), active Premium subs in your bucket, Awin shop purchases by referred users.
- Claimable USD from BOTH rails separately + combined + paid USD + next payout date.
- Refund-holdback pipeline + per-app earnings funnel (sub vs Awin commission stacked).

12. Brand assets (download)

Logo, app screenshots, label-scan demo footage, stash-tour B-roll, colour palette and ready-made captions: getklar.org/i/yarnstash/brand-assets (link goes live with your onboarding mail).

13. FAQ

How does the Awin shop commission work?

When a user clicks through from your link, installs the app, and later buys yarn in-app via Knit Picks or Minerva, Awin fires a postback. Klar earns ~5-10% commission on that basket; your share is a portion of that. 24-month attribution window same as the sub.

What if the user buys yarn outside the app?

Then it doesn't attribute - only in-app purchases via the Awin-deep-linked shop rail. That's a feature, not a bug: we wanted clean attribution rather than fuzzy 'maybe-they-bought-because-of-this' tracking.

Can I post pattern previews?

Yes, but Ravelry has specific rules about derivative content. Always link your own designs back to Ravelry as the primary source. We have a brand-asset bundle with the Ravelry-friendly framing.

What about non-yarn fibre crafts (sewing, embroidery)?

Not a fit - different app. We're building specifically for yarn-based crafts.

Flat fee on top?

Yes. Designer and dyer audiences command higher rates because of niche-trust. Mid-tier 150-500 USD per post, macros 500-1500 USD. Rev share + Awin stay on top.

Disclosure?

Yes. Rev-share + Awin commission = paid recommendation. #ad / #sponsored / IG "Paid Partnership". Craft audiences are unforgiving of hidden affiliate links.

14. One last thing

Honest read: My Yarn Stash fits creators who actually knit or crochet. Designers, dyers, KnittingTok, CrochetTok, stash-tour, FO carousels - all good fits. Aesthetic-only fibre content where nobody actually knits is not a fit. The Awin rail makes designer and dyer creators particularly lucrative because their audience already buys yarn constantly. Reply to Mail 2 - yes, no, or 'let's see if my audience actually buys yarn'. We don't push.

On posts with affiliate link: #ad / #sponsored / Paid Partnership (FTC, EU disclosure law).
