

My Yarn Stash

Photo of the yarn label, AI auto-fills everything, matches to Ravelry patterns from your stash. Plus shop commissions.

What it is

My Yarn Stash is an iOS + Android app for hobby knitters and crocheters. Photograph the yarn label, AI extracts material, yardage, needle recommendation, manufacturer and colour. The app then matches Ravelry patterns the user can actually knit with their current stash. Plus: project tracking, FO logbook (finished objects), pattern-match history, and group sharing for knit circles. Two revenue rails for the affiliate: 50% on Premium subs AND a share of Awin shop commissions when the referred user buys yarn in-app.

Who it is for

Hobby knitters, crocheters and fibre artists from beginners with a single shelf to power users with several hundred labels. Audience skews ~90% female, high purchasing power, EU + US + UK + AU.

- Project tracking + FO logbook: in-progress with photo, finished objects archive, yardage actually used.
- Group sharing for knit circles: 1 small group on Free, unlimited groups on Premium.
- Awin in-app shop rail: deep-linked Knit Picks and Minerva purchases, no separate browser flow.

How tracking works (one paragraph)

Your link `yarnstash.app/i/[handle]` works on every platform. Android attribution is deterministic via Google's install-referrer. iOS warm installs use Universal Links. iOS cold (~99% of creator traffic) uses our own signed-token clipboard deferred-deeplink - live-verified, no Branch.io. RevenueCat fires on Premium purchase, 50% credited to your handle for 24 months. Awin shop commissions on yarn purchases your referred users make are also tracked and credited - see Extended Brief for the dual-rail walkthrough.

For the full attribution walkthrough plus how the Awin shop-commission rail attributes to the same handle as the Premium sub, see the Extended Brief PDF in this folder.
