

Kelva: Affiliate Playbook

As of May 2026 — for DACH creators in consumer / saving / lifehack space

Subtitle: "Connect mail inbox, app parses receipts automatically. Earn from content your audience already needs."

1. App in 60 seconds + business model

Kelva is an iOS+Android app for DACH+EU that digitally manages receipts, warranties and subscriptions. You connect multiple mail addresses (read-only), incoming mail lands directly in Kelva, gets parsed by AI or a quick manual scan, you classify it (invoice, warranty, sub, contract) and set reminders. The overview holds all receipts, warranties and subs in one place, plus an optional vault for important documents. With household sharing you open a shared family inbox — everyone sees what is going on, priorities are split, nothing falls through the cracks.

Why this works (origin story): Alain and his circle always had a problem with overflowing inboxes. Plus the subs he only noticed via the payment confirmation. Brief annoyance, an hour later forgotten, until the next debit. At some point he thought: why not solve both in one tool. That's how Kelva was born.

Free vs Premium:

- **Free:** manual receipt entry + photo scan, push reminder 30/7/1 day before expiry, Snap-to-Done, §438 auto-calculation, manufacturer warranty lookup, household sharing
- **Premium (29.99 USD/year):** AI-based email inbound classification (email scan mode off / warranty-only / all) + advanced family features

Market: DACH + EU, adults 25-55, families with a lot of device inventory, hands-on DIY types, consumer-conscious. Currently DACH-focused due to §438 BGB + UWG compliance.

Live status: App-Store-LIVE since May 2026 (Apple-approved). 5 languages (DE/EN/ES/FR/IT) internally, legal texts currently DE+EN. Production OTAs reach real users.

2. Tracking + attribution architecture

Your link: `kelva.space/i/[yourhandle]`

3 tracking paths:

1. **Android (install referrer):** Google Play passes your handle natively to the app. Deterministic. 2. **iOS warm (Universal Link):** app already installed -> link opens the app with handle. 3. **iOS cold (~99% of creator traffic):** signed token to clipboard via landing page, app reads on first open. Live-verified via sister app On Wavelength.

Conversion flow: click -> landing -> App Store -> install -> first-open + optional "Invited by @[handle]?" confirmer -> Premium purchase via RevenueCat webhook -> 50% rev-share for 24 months to you.

Payout:

- 30-day refund holdback against chargebacks
- Monthly via Wise/PayPal/SEPA
- Minimum 50 EUR (otherwise carry-over)

24-month cap per user. Self-referral blocked.

3. Marketing strategy A: faceless content

When you produce DACH lifehack content without showing your face. Kelva is demo-strong — the workflow + the table overview perform visually.

Hook 1: screen recording "mail in, app parses everything"

- 30s, app screen only
- Email inbound view pops up, AI classifies, you assign, reminder is set
- Voiceover or TTS: "Our family receipt folder used to be a shoebox. Now: 1 app."

Hook 2: B-roll family inbox + voiceover

- 45s, B-roll of overflowing mail inboxes + receipt folder + tangled receipt clumps
- Voiceover: "Order confirmations, warranty mails, subs you forgot. Three inboxes, no overview."
- Cut to Kelva dashboard with all receipts sorted

Hook 3: §437 BGB explanation with app demo

- 60s, static slide with BGB paragraph text
- Voiceover explains: "Device breaks after 18 months — you still have 6 months of warranty. But who remembers when they bought it?"
- Cut to Kelva with auto-calculated deadline + claim notice

Hook 4: comparison "Word doc vs Kelva"

- 30s, split-screen
- Left: Excel table with 47 devices, nobody maintains it
- Right: Kelva with family inbox + push reminder
- Voiceover: "Which one do you do today?"

Hook 5: claim-letter reveal (roadmap feature, optional)

- 20s, app screen
- "Dryer is broken — 1 tap -> legally sound §437 letter ready to send"
- (Note: claim letter is roadmap, don't promise as immediately available in the faceless variant — tease as upcoming)

Faceless advantage: the DACH lifehack audience rewards clear demos. You can do volume (3 reels/week) without selfie.

4. Marketing strategy B: UGC / your voice

When you're a lawyer, savings-tip creator or family organiser. Your authority is the asset.

Hook 1: lawyer explainer clip "§437 BGB in practice"

- 60s, you in lawyer setting or home office
- "Three sentences §437 — repair, replacement, withdrawal. Which deadline applies? Most don't know."
- Cut to Kelva app demo + push reminder
- "Kelva calculates that automatically. Affiliate link in bio."
- (Lawyers: respect BORA — do not suggest concrete legal advice in the Kelva context)

Hook 2: family vlog "How I manage our receipts"

- 90s, your normal family vlog format
- Kelva as a 10-second beat: "I now have our warranties here, everyone in the household sees them"
- Demo household sharing
- Natural integration

Hook 3: "What happens when your dryer breaks after 18 months"

- 75s, you in selfie mode explaining the scenario
- Show: without Kelva = you search the receipt for hours / with Kelva = 3 taps, you have date + warranty status + next steps
- Strong conversion format because the pain is concrete

Hook 4: savings-coach persona "How I don't lose 200 EUR a year"

- 60s, you as a savings coach in selfie mode
- "Last month I missed an expired warranty claim — 280 EUR gone. Here's the app that would have caught it."
- Demo push reminder

Hook 5: household sharing demo with real family

- 90s, you + partner or kids at the table
- "Who handles the washer-dryer? I do. Who handles the game console? You. Now both of us see all warranties."

- Demo the household sharing feature
- Convincing for family niches

UGC advantage: DACH lawyer TikTokers convert above proportion (authority + specific pain). Savings-tip creators have a high-purchasing audience.

5. Creator pool in your niche

Top-fit subniches (all DACH):

Niche	Platform	Size	Conversion
Lawyer TikTokers (consumer law)	TikTok	50k-1M	very high (authority + demo fit)
Savings-tip creators	IG/TikTok	10k-100k	high (purchasing audience)
Family-organisation IGers	IG	5k-50k	very high (loyal, engaged)
Lifhack DACH	TikTok	30k-300k	medium (broad reach)
Tech reviewers DACH (small)	IG/YT	5k-50k	medium (device angle)
Family-mom influencers	IG	10k-100k	high (inventory pain is real)

Anchor creators (reference, not direct day-0):

- **Finanzfluss** @finanzfluss (~500k+, PR route)
- **Finanztip** @finanztip (PR route)
- **Saidi Sulilatu** @saidi.dergeldverdiener (Finanztip co-host)

→ Useful as authority reference in the pitch, too expensive for direct outreach on day-0.

Best-fit group: lawyer TikTokers. Search #anwaltvertiktok + #verbraucherrecht on TikTok, there are 100k-1M creators who already produce consumer-law content. Kelva is perfect demo content for them.

Hashtags: TikTok: #verbrauchertipps #verbraucherrecht #geldsparen #spartipp #lifehacks #lifehacksdeutsch #haushaltstipps #familienalltag #geldzurück #reklamation #garantie #kaufrecht #anwalttipps #bgb #recht #familyhack

IG: #geldsparen #spartipps #verbraucherschutz #haushaltsführung #familienorga #ordnungimhaushalt #lifehackdeutsch #kaufberatung #finanztipps #verbraucherrecht

Power move 1: lawyer TikTokers with #anwaltvertikt — you supply them with demo content for their existing topics. Win-win.

Power move 2: family-organisation IGers (Marie-Kondo DE style) — their audience has 47 devices, no overview, high conversion.

6. Conversion math (example calculations)

Micro family-organisation IGer (15k IG, 1 reel):

- Views: 8,000
- CTR: 1.8% = 144 clicks
- Install: 35% = 50 installs
- Premium conv: 7% = 3-4 subs (family inventory pain is real)
- $14 \text{ months} \times 29.99/12 \text{ USD} \times 50\% = \sim\mathbf{52-70 \text{ USD per reel}}$ (annual sub dominates)
- With annual mix: $4 \text{ subs} \times 29.99 \times 50\% = \mathbf{60 \text{ USD directly}}$ (no monthly stretching)

Mid-tier savings-tip creator (50k TikTok, 1 clip):

- Views: 30,000
- CTR: 1.5% = 450 clicks
- Install: 30% = 135 installs
- Premium conv: 8% = 11 subs
- Annual mix: $11 \times 29.99 \times 50\% = \sim\mathbf{165 \text{ USD}}$ (or via monthly: $14 \text{ months} \times 2.50 \text{ USD} \times 50\% \times 11 = \sim 190 \text{ USD}$)

Lawyer TikToker (200k TikTok, 1 consumer-law clip):

- Views: 120,000
- CTR: 2% (authority boost) = 2,400 clicks
- Install: 30% = 720 installs
- Premium conv: 10% (audience follows the lawyer's recommendation) = 72 subs
- Annual: $72 \times 29.99 \times 50\% = \sim\mathbf{1,080 \text{ USD from one clip}}$ (cap depending on mix ~1,500-2,000 USD)

DACH conversion is high because the pain is specific + consumer awareness is traditionally strong.

7. Onboarding + payout (5 minutes)

Mail 2 contains your **personal onboarding link** (valid 7 days). Click -> choose pay method (Wise/PayPal/SEPA) -> activate Free Lifetime Premium.

Dashboard: [getklar.org/admin/affiliate/kelva/\[handle\]](https://getklar.org/admin/affiliate/kelva/[handle]) via magic link. Shows clicks/installs/subs/payable/carry-over in real time.

8. FAQ + compliance

"Privacy: what happens with my users' mail?" Kelva reads mail inboxes read-only via OAuth, only users themselves see content. The Kelva backend does NOT store the mails — only the structured parses (product, brand, date, warranty deadline).

"§437/§439 claim letter — is that already in the code?" Snap-to-Done, §438 auto-calc, manufacturer warranty lookup, email inbound, push 30/7/1, household sharing are LIVE. Claim letter (§437/§439 BGB) is a roadmap feature — please do not promise as immediately available.

"BORA for lawyers — dangerous?" Lawyers may mention the app in content, but must not suggest concrete legal advice in the Kelva context. "App calculates deadline" = ok. "I give you legal advice via the app" = not ok. Safer frame: "tracking tool that helps you manage deadlines + letters".

"UWG §5a disclosure?" Mandatory on sponsored. #ad / #werbung / "in cooperation with Kelva". Warning-letter risk for you and us if missing.

"Flat fee on top possible?" Mid 150-500 USD, lawyer TikTokers 300-1500 USD depending on reach. Book the 15-minute intro call for that.

"What if Premium price changes?" You continue to earn 50% on the then-current price.

Kelva is operated by Alain Kessler (CH, sole proprietorship). Currently DACH-focused due to §437/§438/§439 BGB specifics. The affiliate program is a direct agreement between you and me. Questions to alainkessler04@gmail.com.
