ThrottleUp

ThrottleUp: Affiliate Playbook

As of May 2026 — for moto creators and ADV riders

Subtitle: "VIN scan, recall alerts, multi-bike. Earn from maintenance content you already make."

1. App in 60 seconds + business model

ThrottleUp is an iOS+Android app for motorcycle maintenance tracking. The VIN scanner pulls make/model/year/engine class live from NHTSA vPIC. Recall integration runs against the NHTSA Recalls API. You set service intervals per bike (mileage + time based), push reminders fire 30/7/1 day before due. Multi-bike for those with 2+ bikes in the garage. Plus: maintenance log with photo attachments, PDF/CSV export, anonymous public trip-sharing with privacy-cropped routes.

Why this works: The market is empty. RIDEOLOGY has 2.2 stars, "Motorcycle Maintenance Log" has 1.9k downloads total. Most riders track in a Word doc or not at all.

Free vs Premium:

- **Free:** 1 bike, 1 riding group with up to 4 members, unlimited maintenance entries, VIN decode, recall lookup, PDF/CSV export, public trip sharing
- **Premium (3.99 USD/month or 24.99 USD/year):** unlimited bikes + larger/more riding groups
- Deliberate strategy: Free is generous (every rider gets in with no friction), Premium is only for heavy riders with 2+ bikes or large groups

Market: riders worldwide, hobby maintenance crowd, ADV riders, touring, cafe-racer/custom builder. 95%+ male, 20-55, high purchasing power.

Live status: Apple review in progress (Build 11/v1.0.1 submitted), approval expected. Android paused until Android RC key is set. Production OTAs are pre-launch safe.

2. Tracking + attribution architecture

Your link: `throttleup.app/i/[yourhandle]`

3 tracking paths:

1. **Android (install referrer):** Google Play install referrer passes your handle natively. Deterministic.
2. **iOS warm (Universal Link):** app already installed -> direct open with handle.
3. **iOS cold (~99% of creator traffic):** signed token to clipboard via landing page, app reads on first-open. Live-verified via Wavelength.

Conversion flow: click -> landing -> install -> first-open -> Premium purchase via RevenueCat -> 50% to you for 24 months.

Payout: 30-day refund holdback, monthly via Wise/PayPal/SEPA, minimum 50 USD/EUR.

24-month cap per user. Self-referral blocked.

3. Marketing strategy A: faceless content

When you want bike content without you in front. Bikes are hero visual enough on their own.

Hook 1: screen recording "VIN scan in 3 seconds"

- 15s, app screen + phone over bike
- Aim VIN scanner frame at sticker, cut to app with make/model/year filled in
- Voiceover or TTS: "stop typing VINs into spreadsheets"

Hook 2: garage B-roll with voiceover

- 45s, B-roll of your garage / tools / bike detail shots
- Voiceover (your own voice or TTS): "I have 3 bikes. I used to track maintenance in a Word doc. Here's what changed."
- Cut to app multi-bike switcher

Hook 3: comparison "RIDEOLOGY (2.2) vs ThrottleUp"

- 30s, split-screen with both app screens
- Left: RIDEOLOGY's UI chaos
- Right: ThrottleUp's service reminder + recall popup
- Voiceover or TTS

Hook 4: service-log time-lapse

- 20s, app screen time-lapse: oil change entry, photo upload, reminder setup, reminder in 30 days
- Trending moto sound (e.g. engine idle as background)

Hook 5: recall popup demo (no face, app only)

- 10s, push notification "RECALL for your 2021 Yamaha MT-07: brake line defect"
- Cut to app recall detail screen with NHTSA link-out
- "this is why I don't track maintenance in Excel"

Faceless advantage: moto visual + app UI are good on their own. You don't need your face. The algorithm loves bike detail shots + tool demos.

4. Marketing strategy B: UGC / your voice

When you show your bike + yourself. Riders trust riders. Authentic maintenance vlogs convert hard.

Hook 1: "How I track maintenance now" format

- 60s, you in selfie mode next to your bike
- "I used to forget oil changes for 4 months. Here's what I do now."
- Cut to app demo: VIN scan + service reminder setup
- Outro: your affiliate link in bio

Hook 2: build vlog with app integration

- 90s, your normal maintenance/build vlog
- ThrottleUp as a 5-second beat: you log the maintenance in the vlog "and I'm putting this in ThrottleUp so I don't forget the next interval"
- Natural integration into your existing workflow

Hook 3: "POV: you're the guy with 3 bikes"

- 30s, you in the garage with multiple bikes
- "Bike 1: service due in 2 weeks. Bike 2: recall just dropped. Bike 3: oil change last weekend. Here's how I keep that straight."
- Cut to multi-bike switcher

Hook 4: trip recap with app use

- 60s, your ADV/touring trip recap
- 10-second beat: "geographic data + service stats from this trip" -> cut to app trip summary
- Affiliate link at the end

Hook 5: cafe-racer build-log reveal

- 45s, your custom bike + app build log with all historical service entries + photos per entry
- "Here's the complete maintenance documentation as PDF — direct value for resale"
- Cut to PDF export demo

UGC advantage: rider audiences buy from riders. Trust + authority are high when you show your own bike + your routines.

5. Creator pool in your niche

Top-fit subniches:

Niche	Platform	Size	Conversion
ADV/touring (Itchy Boots style)	IG	50k-500k	high (loyal, maintenance-aware)
Tech/gear reviewers	IG/YT	100k-1M	high (tool mindset)

Sport-bike lifestyle	TikTok	50k-2M	medium (poseur share)
MotoVlogger	TikTok/IG	50k-500k	high (authentic)
Cafe-racer/custom builder	IG	20k-300k	very high (co-promo via build log)
EU moto creators	IG/TikTok	5k-50k	high (smaller market)

Anchor creators:

- **Itchy Boots** @itchyboots (NL ~400k, ADV travel)
- **FortNine** @fortnine (CA, gear reviews, Ryan F9 personality)
- **DanDanTheFireman** @dandanthefireman (US, ADV sport)
- **Bike EXIF** @bikeexif (~300k, custom build editorial)
- **The Bike Shed** @thebikeshed (UK + LA custom community)

Hashtags: TikTok: #motorcycletiktok #motovlog #sportbikelife #bikerlife #advrider #adventurebike #oilchange #motorcyclemaintenance #caferacer

IG: #motorcycle #motorcyclelife #bikersofinstagram #ridersofinstagram #sportbike #adv #caferacer #custombike #motorcyclemechanic

Power move 1: ADV riders have very loyal audience trust. One honest reel from an ADV creator = often 10+ subs from their core.

Power move 2: cafe-racer/custom-builder co-promo. You document your build in the ThrottleUp log -> photo per service -> at sale, that shows the maintenance history -> works as a selling point.

6. Conversion math (example calculations)

Micro MotoVlogger (15k IG, 1 reel):

- Views: 9,000
- CTR: 1.8% = 162 clicks
- Install: 30% = 49 installs
- Premium conv: 5% = 2-3 subs (Free is generous enough for 1-bike owners)
- 16 months × 3.99 USD × 50% = **~70-100 USD per reel**

Mid-tier ADV rider (80k IG, 1 reel):

- Views: 50,000
- CTR: 1.5% = 750 clicks
- Install: 30% = 225 installs
- Premium conv: 6% = 14 subs (multi-bike share higher in this audience)
- 16 months × 3.99 × 50% = **~450 USD per reel** (cap ~675 USD)

Macro tech reviewer (300k IG, 1 service vlog):

- Views: 180,000
- CTR: 1% = 1,800 clicks
- Install: 25% = 450 installs
- Premium conv: 7% = 32 subs
- 16 months × 3.99 × 50% = **~1,020 USD per vlog** (cap ~1,530 USD)

Conversion is lower than e.g. Kelva or MyLoo because the free tier is very generous (1 bike is enough for most). So focus on multi-bike audience + touring + ADV.

7. Onboarding + payout (5 minutes)

Mail 2 contains your **personal onboarding link** (valid 7 days). Click -> choose pay method -> activate Free Lifetime Premium.

Dashboard: [getklar.org/admin/affiliate/throttleup/\[handle\]](https://getklar.org/admin/affiliate/throttleup/[handle]) via magic link. Shows clicks/installs/subs/payable/carry-over in real time.

8. FAQ + compliance

"Free tier is very generous — do I earn anything at all?" Yes, but not every user. Conversion mix: 60% stay Free (1 bike, small group), 40% go Premium when they have 2+ bikes or plan trips for 10+ people. You earn on those 40%.

"Can I promote recall content as well?" Yes, that's USP. Please do NOT use "increases bike value" as a hard claim — we are a tracking tool, not a valuation service. Say "easier to sell" / "maintenance documentation ready" instead of "increases value".

"Build-log feature for custom builders — available?" v1 has maintenance log with photo attachments. Full build log with step-by-step documentation is V2 phase. The current state is enough for service history + selling point.

"Disclosure duty?" Yes. Rev-share = paid recommendation. #ad / #sponsored / IG "Paid Partnership". FTC/EU/UWG.

"Flat fee on top?" Mid+ yes, 200-600 USD depending on reach. Macro 500-2000 USD only if audience fit is crystal-clear (maintenance content, not posing content).

ThrottleUp is operated by Alain Kessler (CH, sole proprietorship). NHTSA recall data is US-centric; EU recall source planned for V2. The affiliate program is a direct agreement between you and me. Questions to alainkessler04@gmail.com.
