Trubel

Trubel: Affiliate Playbook

As of May 2026 — for creators who want to know whether this fits

Subtitle: "Drop a QR, all photos collect themselves. Earn from birthday recaps."

1. App in 60 seconds + business model

Trubel is an iOS+Android app for photo albums with QR-code magic. You host a hangout (birthday, bachelorette, housewarming, flatshare party), generate a QR card, every guest scans + takes photos normally with their iPhone camera. After the event the app scans your guests' camera roll automatically within the correct time window (optional GPS radius) and collects every photo into one album.

Why this works: "Send me your pics" in the group chat dies after 4 days. Trubel collects automatically what is already on the phones.

Free vs Premium:

- **Free:** 3 active albums, 20 photos per album, 4 members per album
- **Premium (~5 EUR/month or 30 EUR/year):** unlimited albums, unlimited photos, unlimited members, public World-Map pin
- **Standalone:** 4K album download as a consumable 1.99 USD per album (no sub needed)

Market: Gen-Z 18-28, US + UK + DACH. iPhone bias 80%. Competition POV.contact / FridaySnap / Lapse / everlense — all web-app-centric, Trubel is native camera-roll scan.

Live status: App-Store-LIVE since May 2026 (Apple-approved after 2 reject rounds). Production OTA reaches real users.

2. Tracking + attribution architecture

Your link: `trubel.space/i/[yourhandle]` (works on any platform — IG bio, TikTok bio, story sticker, caption)

3 tracking paths per device:

1. **Android (install referrer):** Google's Play install referrer API passes your handle natively to the app on first start. Deterministic, no trick. 2. **iOS warm (Universal Link):** app was installed before -> link opens app directly with your handle as parameter. Deterministic. 3. **iOS cold (~99% of influencer traffic):** fresh installs. We write a signed token to the clipboard on the landing page, the

app reads it on first start. Proven functional, live-verified via sister app On Wavelength. No Branch.io, no vendor lock-in.

Conversion flow: click -> landing -> App Store -> install -> first-open with handle -> Premium purchase via RevenueCat webhook -> we match user ID with your referral -> 50% credited to you for 24 months.

Payout:

- 30-day refund holdback against chargebacks
- Monthly batch in the following month
- Minimum 50 EUR (otherwise carry-over to the next month)
- Pay method: Wise / PayPal / SEPA, your choice in onboarding

Self-referral blocked. Family/friends through your link are fine.

24-month cap: you earn on each user for at most 24 months from their first sub. Industry standard maximum.

3. Marketing strategy A: faceless content (no face)

When you don't want to be on camera. Trubel is visually good — the app itself, B-roll footage from parties, camera-roll UI. You use your voice in voiceover or TTS.

Hook 1: "Stop posting 'send me your pics' in the group chat"

- 15s, voiceover over B-roll of 5 different birthday parties (stock or own camera roll)
- Smash cut to QR card reveal in the app
- Cut to album with 200 photos appearing "on their own"
- CTA: "Trubel — link in bio"

Hook 2: screen-recording only "How I'll plan my next bday"

- 30s, app screen recording only (no face)
- Create album -> QR card design -> share sheet -> photo-collection animation
- Audio: trending sound, no own voice needed

Hook 3: time-lapse "Empty album to 247 photos"

- 10s, speed-up of the album page as photos come in
- Caption "this is what 12 friends look like on bachelorette weekend"

Hook 4: compilation "5 apps that save your birthday planning"

- Carousel or slideshow, Trubel on slide 1 or 3 (not 5, otherwise skipped)
- Only logos + use case in 1 sentence
- Bio link = your affiliate link

Hook 5: before/after split-screen

- Left: group-chat chaos with 47 "send me ur pics" notifications
- Right: Trubel album with 247 photos automatically in
- 8s loop, no voice needed

Faceless advantage: you can do volume (3 reels/week) without make-up + setup. The algorithm loves UI-heavy content for apps.

4. Marketing strategy B: UGC / your voice

When you're a person/hostess in front of the camera. Trubel is social-proof-strong — you as someone who plans parties is the natural authority.

Hook 1: POV format "POV: your friend made an album for our hangout"

- 20s, selfie mode
- You see the QR card in the group chat, scan it at the party, at the end cut to the finished album with your own photos in
- Voiceover of your own reaction

Hook 2: birthday recap vlog with album reveal

- 60s, mix of your vlog + Trubel album reveal at the end
- "Here are all the photos from last night that I didn't take myself — thanks Trubel"

Hook 3: "Day in my life as a hostess" format

- Embed Trubel as a 5-second beat in your normal vlog format
- You build the QR card in the morning, in the evening cut to album filling
- Natural product integration

Hook 4: selfie tutorial "How I plan a bachelorette"

- 90s, you in selfie mode + cuts to app screen
- Step 1-5, Trubel is step 3 "the photo problem solved"

Hook 5: story series instead of reel

- IG stories, 5 slides with link sticker
- Slide 1: "best decision for my bday"
- Slide 2-3: QR card demo
- Slide 4: album reveal
- Slide 5: your affiliate link as link sticker

UGC advantage: trust + conversion are higher than faceless. Audience buys more from "a real person" than from a voiceover. Posting frequency lower, but more subs per post.

5. Creator pool in your niche

Subniches that work:

Niche	Platform	Typical size	Conversion expectation
Birthday-recap creators (Gen-Z)	TikTok	10k-500k	high (pain is real)
Bachelorette planners	IG	20k-200k	very high (event pain)
College lifestyle	TikTok	50k-1M	medium
Flatshare content EU	IG/TikTok	10k-100k	high (loyal audience)
Festival/travel groups	IG	50k-500k	medium-high (seasonal)
Camera-roll aesthetic	TikTok	100k+	medium (broad reach)

Hashtags to cross-post: TikTok: #birthdaygirl #birthdaytrip #21stbirthday #besties #girltrip #friendshipgoals #housewarming #partyplanning #collegelife #dormlife #fyp #photodump #cameraroll #iphonecamera

IG: #bestfriends #birthdayweekend #partyplanning #eventplanning #bachelorette

Power move: search TikTok for "POV.contact", "FridaySnap", "Lapse app" — whoever has posted about the competition is a warm audience for Trubel (same pain, better solution).

6. Conversion math (example calculations)

Micro creator (15k followers, 1 TikTok reel):

- Views: 8,000
- CTR on bio link: 1.5% = 120 clicks
- Install: 35% = 42 installs
- Premium conversion: 8% = 3-4 subs
- 12 months × 5 EUR × 50% = **~90-120 EUR from one reel**

Mid-tier (100k followers, 1 reel):

- Views: 60,000
- CTR: 1.5% = 900 clicks
- Install: 30% = 270 installs
- Premium: 8% = 22 subs
- 14 months × 5 EUR × 50% = **~770 EUR from one reel** (24-month cap ~1,300 EUR)

Macro birthday-recap creator (300k followers):

- Views: 180,000
- CTR: 1% = 1,800 clicks
- Install: 25% = 450 installs

- Premium: 8% = 36 subs
- 14 months × 5 EUR × 50% = **~1,260 EUR** (cap ~2,160 EUR)

Conversion rates are based on Wavelength benchmarks + event-driven-apps market. Your concrete setup will vary.

7. Onboarding + payout (5 minutes)

In the Mail 2 you just read is your **personal onboarding link** (valid 7 days). Steps:

1. Click the link 2. You land on `trubel.space/affiliate/[your-token]` 3. You fill in: handle + display name, pay method (Wise/PayPal/SEPA + details), country for tax docs, billing address 4. We generate your **personal link** and mail it to you 5. Dashboard `getklar.org/admin/affiliate/[handle]` is unlocked (magic link by mail) 6. Free Lifetime Premium is active on your Trubel account

Dashboard shows in real time:

- Clicks per day/week/month
 - Installs (Android / iOS-warm / iOS-cold separated)
 - Active Premium subs in your bucket
 - Payable amount + carry-over
 - Next payout date
 - Refund holdback pipeline
-

8. FAQ

"What if I want Free Lifetime Premium but don't want to post?" Fine. We send Premium anyway. Posting is voluntary. Whenever you decide to post, the link is ready.

"Can I use the link in multiple posts?" Yes, any number of times. It is your link for 24 months per conversion. More posts = more conversions.

"What if I stop?" Subs that came in during your active time are still paid out until each user's 24-month mark.

"Flat fee on top possible?" Yes. Mid/macro can negotiate 100-500 USD per sponsored post on top of the rev-share. Book the intro call for that.

"Disclosure duty?" Yes. Rev-share counts as a paid recommendation. Please use `#ad / #sponsored` / IG "Paid Partnership". FTC/EU/UWG, otherwise warning-letter risk for you and us.

"What if Premium price changes?" You continue to earn 50% on the then-current price. If we move to 7 EUR/month, you get 3.50 EUR per sub-month.
