

Kelva

for consumer / savings / lifehack creators - and what the research says about how to pitch it

"Connect mail inbox, app parses receipts automatically. Earn from content your audience already needs."

You replied, thank you. This is the long-form companion to the email. It walks through what the research says about face-on-camera vs faceless content, then breaks down which path fits your creator archetype.

Contents: 1. App + business · 2. UGC vs faceless - what the research says · 3. Creator types table · 4. UGC strategy · 5. Faceless strategy · 6. Audience fit · 7. Cadence · 8. Conversion math · 9. Tracking summary · 10. Onboarding · 11. Dashboard · 12. Brand assets · 13. FAQ · 14. One last thing

1. App + business in 60 seconds

Kelva is an iOS + Android app that digitally manages receipts, warranties and subscriptions. You connect multiple mail addresses (read-only), incoming mail lands in Kelva, gets parsed by AI or manual scan, you classify it and set reminders. Overview holds all receipts, warranties and subs in one place. Household sharing opens a shared family inbox. Shipped in DE / EN / ES / FR / IT.

Why it sells

Overflowing inboxes, subs you only notice when they debit, warranty receipts in a shoebox. Three messes, no overview - in any country. Kelva is the single place that does all three.

Free vs Premium

- Free: manual entry, photo scan, reminders, Snap-to-Done, \$438 auto-calc (DE), manufacturer lookup, household sharing.
- Premium (29.99 USD/year): AI email-inbound classification + advanced family features.
- Free Lifetime Premium for onboarded affiliates.

2. UGC vs faceless - what the research says

Face-on-camera content (UGC) converts higher than faceless content on average. Faceless still works - just differently.

Two findings from peer-reviewed influencer-marketing research are worth knowing. First, Sokolova and Kefi (2020) showed that parasocial interaction - the sense that a creator is a friend you happen to know through your phone - is a strong driver of purchase intent on Instagram and YouTube. Parasocial trust builds fastest when audiences see a face, hear a voice, and watch a person make choices. Second, Lou and Yuan (2019) found that perceived creator credibility (trustworthiness, expertise, attractiveness) directly increases consumer trust in branded content; creator visibility is one of the strongest credibility signals. Industry data from the Influencer Marketing Hub annual benchmarks consistently puts face-on-camera Reels and TikToks at higher engagement than pure screen-recordings, though the gap varies a lot by niche.

The caveat

Faceless has real strengths. When the demonstration is self-explanatory - a tool doing the thing, a satisfying B-roll, a screen-recording that compresses a 20-minute task into 30 seconds - the product replaces the personality. Faceless also scales: lower production cost per post, no on-camera nerves, easier to outsource. The cost is parasocial trust, which means lower conversion per view but often higher reach.

When each path works

UGC fits when face-on-camera is your credibility asset (you, your craft, your daily reality), when trust matters more than reach, and when you'd naturally say "I personally use this". Faceless fits when the demonstration carries itself (product on screen does the work), when you want to scale output, when on-camera isn't an option, or when you post under a brand persona rather than a personal one.

3. Creator types - which path fits you

Use this table as a first-pass match. Find the row that sounds most like you, see which path (UGC vs faceless) historically converts best for that archetype.

Creator type	Primary path	Best hook angles	Realistic conversion
Lawyer-TikToker (DE: §437/§438)	UGC strong	"The 1 year warranty clock you keep forgetting"; "§437 BGB in three sentences"; reaction-style consumer-rights explainer	2-4% views->install, lawyer trust is very high
Savings / personal-finance	UGC primary	"I missed 280 EUR last month"; "the 5 subs you forgot you pay"; "how I cut my subs from 47 to 12"	1.5-3% in personal-finance niches
Family-mom / parent	UGC primary	"How our family inbox actually works"; "the dryer broke at month 18"; household-sharing demo with real family	2-4%, family content has very high trust + share rate
Lifhack / faceless TikTok	Faceless	Mail-inbox screen-rec demo; "app turns mail chaos into a list"; warranty-deadline countdown slide	0.5-1.5% per view, high posting cadence scales
Tech reviewer (small, device-focused)	UGC + screen-rec mix	"App that tracks the warranty on every device"; receipt-vault tour; reminder-flow demo	1-2% for warranty-conscious audience
Consumer-rights educator (EN/ES/FR/IT)	UGC	Region-specific consumer-protection; "the warranty law that protects you nobody told you about"	1.5-3% in localised consumer-law niches

4. UGC strategy (you on camera)

Who this fits

You on camera. Lawyer-TikToker in a quiet office. Savings-coach at the kitchen table opening a real bill. Family-mom showing the shared inbox with your actual partner. The product is a 5-10 second beat inside YOUR story. Sokolova and Kefi (2020) found parasocial trust is what moves consumer-rights and money-adjacent audiences specifically.

Hook examples that work

- "I lost 280 EUR last month to an expired warranty" - talking head, your honest tone, then phone showing the deadline screen.
- "§437 BGB - three sentences most people don't know" (DE) or "the warranty clock you keep forgetting" (EN/ES/FR/IT).
- "How our family inbox actually works" - kitchen scene with partner/kids, you opening the shared overview.
- "Subs I didn't know I was paying" - selfie, you scrolling through the sub list, real reaction.
- "What happens when your dryer breaks after 18 months" - scenario, with/without Kelva.
- "How I cut my subs from 47 to 12 in one weekend" - process story.
- "Year-one Kelva: honest review" - straight-to-camera 60s.
- "The 1-tap claim letter" - tease the roadmap, don't promise as live.

Format templates

- Talking-head 30s: direct to camera, your honest take, app screen as B-roll.
- Vlog 60-90s: real scenario (a bill arrives, a warranty expires) -> Kelva moment -> outcome.
- Family demo: partner/kids on camera with you.
- Case-study carousel narrated: 6-slide IG with your voice, last slide = link.
- Reaction style: you discover a sub you forgot, real reaction caught on cam.

Do / Don't

- Do: vertical, eye-level, natural light.
- Do: name a real receipt / sub / device. Specificity reads honest.
- Do: put the link in caption AND a story sticker. getklar.org
- Don't: read marketing copy out loud.
- Don't: give specific legal advice through Kelva (BORA risk in DE for lawyers)

5. Faceless strategy (screen-rec, voiceover, B-roll)

Who this fits

Voiceover + screen-recording + mail-inbox-parses-receipt B-roll. Lifehack-TikToker. Tutorial carousel creator. The mail-inbox parsing does the demo work. Kelva's screen-rec moment (email arrives, AI classifies, reminder set) is unusually clean.

Hook examples that work

- "Mail in, app parses everything" - 30s pure screen-rec.
- "B-roll family inbox + voiceover" - 45s shoebox of receipts + overflowing mail, cut to Kelva.
- "Excel vs Kelva" - 30s split-screen, 47-device Excel vs Kelva family inbox.
- "Warranty-deadline explainer" - locale-adapted: §437 BGB (DE), 1-year clock (EN), garantie légale (FR), garantía legal (ES), garanzia legale (IT).
- "5 apps every household needs" - Kelva on slide 1, listicle.
- "How I claimed back a 320 EUR warranty" - case-study carousel.
- "Subscription cleanup process" - 60s screen-rec.
- "Mail-inbox parsing time-lapse" - sped-up AI demo, captions only.

Format templates

- Screen-record demo 20-30s.
- Tutorial carousel: 6 slides, slide 6 = affiliate link.
- Voiceover narrative 45s.
- Listicle: "5 apps every household needs" with Kelva #1-2.
- Case-study carousel: 6-slide warranty-claim story, slide 6 = link.
- Faceless lawyer-explainer: warranty-law deck with voiceover, no face on camera.

Do / Don't

- Do: make the demo self-explanatory.
- Do: post more often. Lifehack faceless scales.
- Do: caption every step.
- Do: localise the warranty-law angle.
- Don't: fake-enthusiastic narration.
- Don't: skip the link in caption + bio.

6. Audience fit

Works well for

- Personal-finance + savings-tip creators worldwide.
- Family-organisation IGers (very high trust + share rate).
- Lifehack creators in any of the 5 app languages.
- Consumer-law explainers: lawyer-TikToker (DE §437/§438; EN/ES/FR/IT consumer-protection generic).
- Small tech reviewers (device-warranty angle).
- Family-mom + parent influencers.

Works poorly for

- Crypto / finance speculation crowd.
- Anti-establishment lifestyle.
- Pure aesthetic accounts without a practical-life angle.

7. Posting cadence + best times

Consumer-lifehack audience: Sunday evening ("plan-the-week") and Wednesday evening ("midweek-organise"). Lawyer-TikToker: any day, edutainment 7-10pm local. Family-mom: weekend mornings + Sunday evenings. 1 reel per week. Stories with link sticker on weekends bring most conversions.

8. Conversion math (why this pays)

50% rev share, 24 months. Premium 29.99 USD/year. Lawyer-TikToker (50k followers): 25,000 views x 2% CTR = 500 clicks, 30% install = 150 installs, 8% Premium = 12 subs, ~180 USD per reel. Savings-tip Mid-tier (80k IG): 40,000 views x 1.5% CTR = 600 clicks, 30% install = 180 installs, 7% Premium = 13 subs, ~195 USD. Family-mom macro (300k IG): reach 120,000 x 1.2% CTR = 1,440 clicks, 25% install = 360 installs, 6% Premium = 22 subs, ~330 USD per post.

9. Tracking summary (full walkthrough in the Extended Brief)

Your link [kelva.space/i/\[yourhandle\]](https://kelva.space/i/[yourhandle]) works on every platform. Android uses Google install-referrer (deterministic). iOS warm uses Universal Link (deterministic). iOS cold (~99% of creator traffic) uses our DIY signed-token clipboard deferred-deeplink, live-verified, no Branch.io. RevenueCat fires on Premium purchase and credits 50% of net revenue to your handle for 24 months from each user's first paid month. 30-day refund holdback before payout becomes claimable. Full walkthrough is in the Extended Brief PDF.

10. Onboarding (5 minutes)

- Click the personal link from Mail 2 (valid 7 days).
- Land on [kelva.space/affiliate/\[your-token\]](https://kelva.space/affiliate/[your-token]).
- Fill in: handle, Wise payout details, country (for tax docs), billing address.
- Get your personal tracking link by mail + dashboard unlock.
- Free Lifetime Premium activation. No posting obligation, no expiry.

11. Dashboard (what you see)

- Live at getklar.org/dashboard (magic-link login).
- Per day / week / month: clicks, installs split (Android / iOS warm / iOS cold), active Premium subs in your bucket.
- Claimable EUR + paid EUR + next payout date.
- Refund-holdback pipeline + per-app earnings funnel.

12. Brand assets (download)

Logo, app screenshots, warranty-deadline explainer slides (locale-adapted), mail-inbox demo footage and ready-made captions: getklar.org/i/kelva/brand-assets.

13. FAQ

Which languages and markets does Kelva work in?

App shipped in DE / EN / ES / FR / IT. §437 / §438 BGB is a DE-law feature; core product works in every market. Affiliates from any country welcome.

Can I post in English (or ES / FR / IT)?

Yes. Pitch core product. For DE additionally lean on §437/§438. For non-DE use generic consumer-protection angle.

Lawyer compliance?

Educate generally (locale-appropriate). Do NOT give specific legal advice through Kelva (BORA risk in DE). "App calculates the deadline" fine. "App writes your claim letter" is roadmap.

Disclosure duty?

Yes. #ad / #sponsored / IG "Paid Partnership".

Flat fee on top?

Mid+ yes, 150-500 USD/EUR per reel. Macro 500-2,000 USD. Rev-share stays on top.

Premium pricing changes?

You earn 50% on the then-current price.

14. One last thing

Honest read: Kelva fits audiences who already think about receipts, warranties or recurring subs. Savings-tip, family-mom, lifehack, consumer-law explainers all fit. Lifestyle-aesthetic or pure-entertainment accounts where nobody cares about a missed warranty story do NOT fit. If your audience would shrug at a 280 EUR missed-warranty story, that's a real answer. Reply to Mail 2 either way.
