

Trubel

for creators who plan birthdays, bachelorettes and friend-group events

"Drop a QR, all photos collect themselves. Earn from birthday recaps you'd post anyway."

You replied, thank you. This is the long-form companion to the email. It walks through what the research says about face-on-camera vs faceless content, then breaks down which path fits your creator archetype.

Contents: 1. App + business · 2. UGC vs faceless - what the research says · 3. Creator types table · 4. UGC strategy · 5. Faceless strategy · 6. Audience fit · 7. Cadence · 8. Conversion math · 9. Tracking summary · 10. Onboarding · 11. Dashboard · 12. Brand assets · 13. FAQ · 14. One last thing

1. App + business in 60 seconds

Trubel is an iOS + Android app for photo albums with QR-code magic. Host a hangout, generate a QR card, every guest scans + takes photos normally. After the event the app scans guests' camera rolls within the time window (optional GPS) and collects every photo into one album. App Store live since May 2026. Two revenue rails: 5 EUR/m or 30 EUR/y Premium sub PLUS 1.99 USD 4K album consumable.

Why it sells

"Send me your pics" group chats die in 4 days. Apple Shared Albums require all-iPhone + accounts. Trubel's automatic camera-roll scan handles it without guests installing or uploading anything. Two payout rails on one reel.

Free vs Premium

- Free: 3 active albums, 20 photos per album, 4 members per album.
- Premium (~5 EUR/m or ~30 EUR/y): unlimited albums, photos, members + World-Map pin.
- Standalone: 4K-album 1.99 USD per album (no sub required).
- Free Lifetime Premium for onboarded affiliates.

2. UGC vs faceless - what the research says

Face-on-camera content (UGC) converts higher than faceless content on average. Faceless still works - just differently.

Two findings from peer-reviewed influencer-marketing research are worth knowing. First, Sokolova and Kefi (2020) showed that parasocial interaction - the sense that a creator is a friend you happen to know through your phone - is a strong driver of purchase intent on Instagram and YouTube. Parasocial trust builds fastest when audiences see a face, hear a voice, and watch a person make choices. Second, Lou and Yuan (2019) found that perceived creator credibility (trustworthiness, expertise, attractiveness) directly increases consumer trust in branded content; creator visibility is one of the strongest credibility signals. Industry data from the Influencer Marketing Hub annual benchmarks consistently puts face-on-camera Reels and TikToks at higher engagement than pure screen-recordings, though the gap varies a lot by niche.

The caveat

Faceless has real strengths. When the demonstration is self-explanatory - a tool doing the thing, a satisfying B-roll, a screen-recording that compresses a 20-minute task into 30 seconds - the product replaces the personality. Faceless also scales: lower production cost per post, no on-camera nerves, easier to outsource. The cost is parasocial trust, which means lower conversion per view but often higher reach.

When each path works

UGC fits when face-on-camera is your credibility asset (you, your craft, your daily reality), when trust matters more than reach, and when you'd naturally say "I personally use this". Faceless fits when the demonstration carries itself (product on screen does the work), when you want to scale output, when on-camera isn't an option, or when you post under a brand persona rather than a personal one.

3. Creator types - which path fits you

Find your row. Trubel pays TWICE on a converted viewer - sub (24 months) AND per 4K-album purchase. The numbers below are sub-only; consumable adds 5-20 events at 1.99 USD each.

Creator type	Primary path	Best hook angles	Realistic conversion
Birthday / bachelorette planner	UGC strong	Real bachelorette recap with QR card moment; "how I run birthdays now"; before/after group-chat-vs-Trubel	3-5%, very high consumable attach
College / study-abroad lifestyle	UGC primary	Day-in-the-life with the QR on the table; "all photos from one night, one tap"; semester recap	2-4%, repeated events compound
Camera-roll aesthetic / carousel	Faceless	Trubel album as IG carousel; slow-mo recap; "the camera roll I didn't have to chase"	1-2%, lower CTR but high posting cadence
Festival vlogger	UGC + Faceless mix	Multi-day festival album recap; QR on the wristband; "everyone's photos, not just mine"	2-4%, festival audience converts on consumable too
Wedding / bachelorette planner	UGC + Faceless mix	Bachelorette-weekend album reveal; "the bride saw 600 photos"; QR card unboxing	3-5% in wedding niches, very high consumable attach
Meme / Gen-Z humor	Faceless	"POV: every birthday group chat ever"; chaotic photo-request screenshots cut to Trubel	0.5-1.5% per view but massive reach

4. UGC strategy (you on camera)

Who this fits

You at the actual event. Birthday host showing the QR card on the table. Bachelorette planner with the bride. College lifestyle creator at the party. Sokolova and Kefi (2020) found parasocial trust is what moves Gen-Z lifestyle conversion.

Hook examples that work

- "I ran my friend's bachelorette and got every single photo back" - recap reel with you in frame.
- "This is how I do birthdays now" - straight to camera at the table with the QR card.
- "600 photos from a weekend I would have lost" - emotional payoff, bride seeing the album.
- "POV: hosting a party in 2026" - happy-host vibes, QR moment in the middle.
- "The QR card I brought to my flatshare housewarming" - kitchen setup, the card, album after.
- "Why I stopped sending 'send me your pics'" - talking head, app as B-roll.
- "Three months of using this for every event" - retrospective.
- "The bride saw photos she never would have" - emotional reel.

Format templates

- Recap reel 60-90s: at the event -> QR card moment -> album reveal.
- Talking head 30s.
- POV-style: "POV: hosting a birthday".
- Emotional payoff: friend/bride reaction.
- Anniversary retro: "6 months of Trubel".

Do / Don't

- Do: post the actual album content.
- Do: name the event specifically.
- Do: link sticker on the recap story.
- Don't: stage the QR moment artificially.
- Don't: oversell the privacy.
- Don't: skip the consumable mention if it fits.

5. Faceless strategy (screen-rec, voiceover, B-roll)

Who this fits

Camera-roll-aesthetic creator. IG carousel maker. Slow-motion recap creator. You're behind the camera, the album does the talking. Trubel's product output IS aesthetic photography.

Hook examples that work

- Trubel album as 10-slide IG carousel.
- Slow-mo recap with photo-grid reveal.
- "Camera roll I didn't have to chase" - silent screen-rec.
- "POV typing: hosting a party" - hands only.
- Time-lapse of guests scanning the QR.
- Stop-motion: photos sliding into the album.
- ASMR-adjacent: QR scan sounds, gentle music.
- Tutorial carousel: "How to set up a Trubel album".

Format templates

- IG carousel 8-10 slides.
- Slow-motion recap 30-45s.
- Silent screen-rec 20s.
- Tutorial carousel: 6 slides, slide 6 = link.
- Time-lapse 60s.
- ASMR-adjacent.

Do / Don't

- Do: use real album photos with consent.
- Do: caption every frame.
- Do: consistent visual identity.
- Do: link in caption AND IG bio.
- Don't: fake-enthusiastic voiceover.
- Don't: trending TikTok audio as only hook.

6. Audience fit

Works well for

- Birthday-recap creators (very high Gen-Z engagement).
- Bachelorette / wedding planners (very high consumable attach).
- College / study-abroad lifestyle accounts.
- Festival vloggers (multi-day = both rails).
- Camera-roll-aesthetic / minimal-photo IG.

Works poorly for

- Solo content (Trubel needs group-event context).
- Audiences over 45 (Gen-Z-native motion).
- Privacy-purist audiences (opt-in but concept scares them).

7. Posting cadence + best times

Gen-Z: Thursday evening 19-22h CET + Saturday morning 9-11h CET. Wedding niche: Sunday evening. Festival niche: real-time during festival season. 1 reel per event. Story sequences before/during/after drive most conversions.

8. Conversion math (why this pays)

50% rev share, 24 months on subs + 50% on every 4K consumable. Premium ~5 EUR/m or ~30 EUR/y. 4K 1.99 USD/album. Birthday-planner reel (50k followers): 30,000 views x 1.5% CTR = 450 clicks, 35% install = 158 installs, 4% Premium = 6 subs (~180 EUR/yr) + 30 consumables x ~5 EUR = ~75 USD = ~225-250 EUR total per reel. Wedding macro (300k IG): reach 120,000 x 1.2% CTR = 1,440 clicks, 25% install = 360 installs, 5% Premium = 18 subs (~540 EUR) + 80 consumables = ~80 USD = ~600+ EUR. Festival vlogger (200k TT): 100,000 views x 1% CTR = 1,000 clicks, 30% install = 300 installs, 3% Premium = 9 subs + 60 consumables (~330 EUR).

9. Tracking summary (full walkthrough in the Extended Brief)

Your link [trubel.space/i/\[yourhandle\]](https://trubel.space/i/[yourhandle]) works on every platform. Android uses Google install-referrer (deterministic). iOS warm uses Universal Link (deterministic). iOS cold (~99% of creator traffic) uses our DIY signed-token clipboard deferred-deeplink, live-verified, no Branch.io. RevenueCat fires on Premium purchase and credits 50% of net revenue to your handle for 24 months from each user's first paid month. 30-day refund holdback before payout becomes claimable. Full walkthrough is in the Extended Brief PDF.

10. Onboarding (5 minutes)

- Click the personal link from Mail 2 (valid 7 days).
- Land on [trubel.space/affiliate/\[your-token\]](https://trubel.space/affiliate/[your-token]).
- Fill in: handle, Wise payout details, country (for tax docs), billing address.
- Get your personal tracking link by mail + dashboard unlock.
- Free Lifetime Premium activation. No posting obligation, no expiry.

11. Dashboard (what you see)

- Live at getklar.org/dashboard (magic-link login).
- Per day / week / month: clicks, installs split (Android / iOS warm / iOS cold), active Premium subs in your bucket.
- Claimable EUR + paid EUR + next payout date.
- Refund-holdback pipeline + per-app earnings funnel.

12. Brand assets (download)

Logo, QR card templates, app screenshots, B-roll, colour palette and ready-made captions: getklar.org/i/trubel/brand-assets.

13. FAQ

How does the consumable attribute?

RC fires when a user buys the 4K-album consumable. Webhook looks up the attribution row and credits 50% of net consumable revenue to your handle. No time cap on consumables.

Do I need to mention the consumable?

Not required. But "and you can grab a 4K download of the whole album for 2 bucks" often increases per-event revenue.

Privacy concerns?

Camera-roll scan is opt-in. Guests scan QR, app explains time + GPS window, they accept or decline. Describe honestly.

Multiple posts?

Yes. 24 months per converted user on subs, no cap on consumable purchases.

Flat fee on top?

Mid-tier \$150-800 per post, macros \$800+. Rev-share stays on top.

Premium pricing changes?

You earn 50% on the then-current price for both rails.

14. One last thing

Honest read: Trubel fits creators whose content already centres on group events. If your content is solo creator-stuff, this is not a fit and that's a real answer. We'd rather have 20 well-fit Gen-Z creators than 200 random ones. Reply to Mail 2 either way.
