

On Wavelength

for creators who plan together - and want to know what they're pitching

"Plan smarter, together. Earn from what you'd share anyway."

You replied, thank you. This is the long-form companion to the email. It walks through what the research says about face-on-camera vs faceless content, then breaks down which path fits your creator archetype.

Contents: 1. App + business · 2. UGC vs faceless - what the research says · 3. Creator types table · 4. UGC strategy · 5. Faceless strategy · 6. Audience fit · 7. Cadence · 8. Conversion math · 9. Tracking summary · 10. Onboarding · 11. Dashboard · 12. Brand assets · 13. FAQ · 14. One last thing

1. App + business in 60 seconds

On Wavelength is an iOS + Android calendar app with two pillars: heatmap voting for group dates (everyone taps when they're free, the app picks the best slot, group chat stays quiet) and a sport-coach workspace for 8 sports covering training and match planning, lineups, live attendance and a drill library. ~5 EUR/m or ~40 EUR/y. Free tier covers heatmap voting on one small group. Premium unlocks unlimited groups + sport-team tools.

Why it sells

"When works for you?" group chats die quietly. Coaches lose 5 minutes every session asking "who's not here?". Wavelength replaces both with one tap. The demo is screen-recordable in 10 seconds.

Free vs Premium

- Free: heatmap voting on 1 group up to 4 members, single calendar.
- Premium (~5 EUR/m or ~40 EUR/y): unlimited groups, sport-team workspace (drills, lineups, attendance), season planner.
- Free Lifetime Premium for onboarded affiliates, no posting obligation.

2. UGC vs faceless - what the research says

Face-on-camera content (UGC) converts higher than faceless content on average. Faceless still works - just differently.

Two findings from peer-reviewed influencer-marketing research are worth knowing. First, Sokolova and Kefi (2020) showed that parasocial interaction - the sense that a creator is a friend you happen to know through your phone - is a strong driver of purchase intent on Instagram and YouTube. Parasocial trust builds fastest when audiences see a face, hear a voice, and watch a person make choices. Second, Lou and Yuan (2019) found that perceived creator credibility (trustworthiness, expertise, attractiveness) directly increases consumer trust in branded content; creator visibility is one of the strongest credibility signals. Industry data from the Influencer Marketing Hub annual benchmarks consistently puts face-on-camera Reels and TikToks at higher engagement than pure screen-recordings, though the gap varies a lot by niche.

The caveat

Faceless has real strengths. When the demonstration is self-explanatory - a tool doing the thing, a satisfying B-roll, a screen-recording that compresses a 20-minute task into 30 seconds - the product replaces the personality. Faceless also scales: lower production cost per post, no on-camera nerves, easier to outsource. The cost is parasocial trust, which means lower conversion per view but often higher reach.

When each path works

UGC fits when face-on-camera is your credibility asset (you, your craft, your daily reality), when trust matters more than reach, and when you'd naturally say "I personally use this". Faceless fits when the demonstration carries itself (product on screen does the work), when you want to scale output, when on-camera isn't an option, or when you post under a brand persona rather than a personal one.

3. Creator types - which path fits you

Use this table as a first-pass match. Find the row that sounds most like you, see which path (UGC vs faceless) historically converts best for that archetype, and use the hook angles as a starting point. Conversion ranges are realistic for this niche; your specific audience will move them up or down.

Creator type	Primary path	Best hook angles	Realistic conversion
Coach (amateur sport)	UGC primary	Whiteboard burial; "5 min asking who's not here"; season-plan time-lapse; assistant-coach POV	3-5% views->install, ~7-12 Premium per 50k reel
Athlete / Sport influencer	UGC + faceless mix	Training-day vlog; drill-library demo; "my coach uses this"; pre-match prep	1-2% views->install, high reach compensates
Meme / sport-humor	Faceless	"POV: group chat from hell"; chaos cut to heatmap; coach-whiteboard parody; whistle-and-spreadsheet	0.5-1% per view, massive reach (often 200k+ views)
Flatshare / lifestyle	UGC primary	"How my flat stopped fighting about dates"; weekend planning story; roomies-around-the-kitchen demo	1-2% in coloc niche, story-link-sticker carries most
Productivity faceless	Faceless	Season-plan time-lapse; "5 tools every coach uses" listicle; silent screen-rec demo; tutorial carousel	0.5-1% per view but recurring posting scales output
Study-with-me / group study	Faceless or UGC light	Study-block heatmap; group-session planner; "how we coordinate revision week"	1-2% in student niches, posting Sun evening + exam season

4. UGC strategy (you on camera)

Who this fits

You on camera. Garage-coach in your sport setting. Coloc lifestyle from your actual kitchen. The product is a 5-10 second beat inside YOUR story, not the whole show. Your voice and your real frustrations do the selling. Sokolova and Kefi (2020) found that this kind of parasocial trust is what actually moves people to install and pay.

Hook examples that work

- "I lost 5 minutes every training asking 'who's not here'" - locker room shot, you frustrated, then phone showing live attendance.
- "This replaced my whiteboard" - you holding the actual sketch, cut to phone with the lineup editor.
- "How my flat finally stopped fighting about dates" - kitchen scene with two roommates, you opening the heatmap.
- "I'm an amateur coach, here's the one app that actually stuck this season" - you in club gear, walk through three features in 60 seconds.
- "POV: you're the coach with the group chat from hell" - chaos clips, smash-cut to the heatmap, your reaction face.
- "My Sunday-night planning ritual" - coffee, laptop closed, just phone open on Wavelength, calm and slow.
- "Coach-whiteboard burial" - playful goodbye to the whiteboard, switch to the app.
- "Three things I learned coaching for 5 years" - talking head, last one is "the right tool fixes the small stuff".

Format templates

- Vlog 60s: setup (the problem in your real life) -> demo (10 seconds of app screen, handheld) -> outcome (what changed for you).
- Talking-head 30s: direct to camera, your honest take, app screen as B-roll behind you.
- Comedy POV: chaotic everyday scene, app as the punchline.
- Saturday-story sequence: 3-4 stories before/during/after training, link sticker on the last one.
- Anniversary retrospective: "6 months of using X - here is what I'd say honestly".

Do / Don't

5. Faceless strategy (screen-rec, voiceover, B-roll)

Who this fits

Voiceover + screen-recording + B-roll. Drill-library TikTok. Tutorial carousel creator. Productivity faceless account. You're behind the camera, the product is on the screen, the value is the demonstration. Wavelength's heatmap is unusually screen-rec friendly, which gives faceless creators a real asset.

Hook examples that work

- "How I plan a full season in 20 minutes" - pure screen-rec: matches entered, trainings duplicated, players imported, done.
- "The drill library that saved my Tuesday" - scroll through drills, build a session in 4 minutes on screen.
- "5 apps every amateur coach actually needs" - Wavelength on slide 1, listicle carousel.
- "POV typing in your living room: a season-plan in real time" - only hands + screen, ambient music, no voice.
- "Watch me set up a flatshare calendar from scratch" - 30s screen-rec, captions, no voiceover.
- "Coach desk POV" - top-down shot of hands + phone + notebook, app does the work, 45 seconds.
- "Weekly planning ritual" - silent montage Sunday evening, calm music, screen highlights.
- "Match-day prep sequence" - split-screen, before/after of lineup editor, 25 seconds.

Format templates

- Screen-record demo 20-30s: the feature does the talking, one caption line per cut, no narration.
- Tutorial carousel: 6 IG slides, screenshots step-by-step, slide 6 = affiliate link in caption.
- Voiceover narrative 45s: your voice over screen-rec, classic "here's what I did and what changed".
- Listicle: "5 tools every coach uses" style, Wavelength as item #1 or #2, no hard sell.
- Time-lapse: 60-second compressed season-setup, ambient track, captions only.
- ASMR-adjacent: app interaction sounds layered with subtle music, no voice, satisfying-tap aesthetic.

Do / Don't

- Do: make the demonstration self-explanatory. If I muted you and didn't read the caption, would I still get it?
- Do: post more often. Faceless scales - 2-3 posts per week beats 1 polished UGC for total reach.
- Do: caption every step. Sound-off viewing is the default; words on screen carry the message.
- Do: keep a consistent visual identity (color, font, music) - faceless accounts rely on the brand of the feed, not the brand of a face.
- Don't: fake-enthusiastic narration. If you have real lived experience, voice it; if you don't, stay silent and let the demo work.
- Don't: skip the affiliate link in caption + bio. Faceless typically has lower CTR per view, so every touchpoint matters.
- Don't: rely solely on TikTok-trending audio. Trending sounds boost reach short-term but rot the post in 3 weeks.

6. Audience fit

Works well for

- Amateur sport coaches across our 8 sports + run-club coaches.
- Productivity / calendar creators with a group-coordination angle.
- Flatshare / roommate / family lifestyle accounts (#flatshare, #wgleben).
- Study-with-me + group-study creators.
- Sport meme / sport-humor accounts (the group-chat-from-hell angle lands well).

Works poorly for

- Solo productivity (Notion-template accounts) - Wavelength is a group tool.
- US high-school football (TeamSnap dominates that niche).
- Pro sport coaches (enterprise tools are the incumbent).

7. Posting cadence + best times

Sport-coach audience: highest engagement Tue + Thu 19-21h CET (post-training, pre-bed scroll). Saturday morning for match-day content. Productivity audience: Mon + Wed 8-10h CET or Sunday evening 18-20h "plan-the-week" mood. Meme audience: weekday evenings 20-23h, Friday is peak. One reel per week is enough for affiliate conversion. One story on top with link sticker brings 30-50% of conversions empirically.

8. Conversion math (why this pays)

50% rev share, 24 months per attributed user. Premium ~5 EUR/m or ~40 EUR/y. Coach reel (50k followers): 30,000 views x 1.2% CTR = 360 clicks, 40% install = 144 installs, 5% to Premium = 7 subs, ~300-400 EUR over 12-24 months from one reel. Productivity reel (100k): 60,000 views x 1.5% CTR = 900 clicks, 35% install = 315 installs, 4% conversion = 12 subs, ~360-450 EUR over 12 months. Drill TikTok (250k): 180,000 views x 0.8% CTR = 1,440 clicks, 30% install = 432 installs, 6% conversion = 26 subs, ~1,500 EUR over 12 months from a single reel. Meme account (500k+): 800k views x 0.4% CTR = 3,200 clicks, 25% install = 800 installs, 2% conversion = 16 subs, ~600 EUR but huge spike in brand awareness.

9. Tracking summary (full walkthrough in the Extended Brief)

Your link [onwavelength.space/i/\[yourhandle\]](https://onwavelength.space/i/[yourhandle]) works on every platform. Android uses Google install-referrer (deterministic). iOS warm uses Universal Link (deterministic). iOS cold (~99% of creator traffic) uses our DIY signed-token clipboard deferred-deeplink, live-verified, no Branch.io. RevenueCat fires on Premium purchase and credits 50% of net revenue to your handle for 24 months from each user's first paid month. 30-day refund holdback before payout becomes claimable. Full walkthrough is in the Extended Brief PDF.

10. Onboarding (5 minutes)

- Click the personal link from Mail 2 (valid 7 days).
- Land on [onwavelength.space/affiliate/\[your-token\]](https://onwavelength.space/affiliate/[your-token]).
- Fill in: handle, Wise payout details, country (for tax docs), billing address.
- Get your personal tracking link by mail + dashboard unlock.
- Free Lifetime Premium activation. No posting obligation, no expiry.

11. Dashboard (what you see)

- Live at getklar.org/dashboard (magic-link login).
- Per day / week / month: clicks, installs split (Android / iOS warm / iOS cold), active Premium subs in your bucket.
- Claimable EUR + paid EUR + next payout date.
- Refund-holdback pipeline + per-app earnings funnel.

12. Brand assets (download)

Logo, app screenshots, B-roll footage, colour palette and ready-made caption snippets:
getklar.org/i/wavelength/brand-assets (link goes live with your onboarding mail).

13. FAQ

I want Free Lifetime Premium but I don't want to post.

That's fine. Premium is sent anyway. We never market in your name. Your link stays ready in case you change your mind.

Can I use the link in multiple posts?

Yes. It's your link, for 24 months per converted user. More posts = more conversions = more payout. No volume cap.

What if I lose interest after 6 months?

We let it rest. Subs that came in during those 6 months continue paying out until each user reaches the 24-month mark.

Can I negotiate a flat fee on top of rev share?

Yes. Mid-tier creators \$150-800 per post, macros \$800+ (DACH CPMs are typically lower). Rev share stays on top.

What happens if Premium pricing changes?

You earn 50% on the then-current price.

Disclosure obligation?

Yes. Rev share counts as a paid recommendation. Use #ad / #sponsored / IG "Paid Partnership".

14. One last thing

Honest read: if your audience plans things together - sport, flatshare, classroom, friend group - Wavelength fits. If they don't, no script makes this work. We'd rather have 20 well-fit creators than 200 random ones, so if you got to the bottom of this and shrugged, that's a real answer too. Reply to Mail 2 either way - yes, no, or "maybe, let's chat". A 15-minute call goes a long way and we don't push.
