

My Yarn Stash

for knitting and crochet creators - and what the research says about how to pitch it

"Photo of the yarn label in, app extracts everything, matches with Ravelry patterns from your stash. Earn from what you already share."

You replied, thank you. This is the long-form companion to the email. It walks through what the research says about face-on-camera vs faceless content, then breaks down which path fits your creator archetype.

Contents: 1. App + business · 2. UGC vs faceless - what the research says · 3. Creator types table · 4. UGC strategy · 5. Faceless strategy · 6. Audience fit · 7. Cadence · 8. Conversion math · 9. Tracking summary · 10. Onboarding · 11. Dashboard · 12. Brand assets · 13. FAQ · 14. One last thing

1. App + business in 60 seconds

My Yarn Stash is an iOS + Android app for hobby knitters and crocheters. Photograph the yarn label, AI extracts material, yardage, needle, manufacturer and colour. App matches Ravelry patterns you can actually knit with YOUR stash. Plus: project tracking, FO logbook, pattern-match history, group sharing. App Store live since May 2026.

Why it sells

Ravelry's mobile app is dead since the 2020 redesign. 10M+ knitters without a native solution. My Yarn Stash fills the gap with AI auto-fill nothing else has.

Free vs Premium

- Free: 30 yarn items, 1 group up to 5 members, manual + photo scan, pattern-match search.
- Premium (4.99 USD/m or 29.99 USD/y): unlimited stash, unlimited groups, AI pattern-match, advanced tracking.
- Free Lifetime Premium for onboarded affiliates.

2. UGC vs faceless - what the research says

Face-on-camera content (UGC) converts higher than faceless content on average. Faceless still works - just differently.

Two findings from peer-reviewed influencer-marketing research are worth knowing. First, Sokolova and Kefi (2020) showed that parasocial interaction - the sense that a creator is a friend you happen to know through your phone - is a strong driver of purchase intent on Instagram and YouTube. Parasocial trust builds fastest when audiences see a face, hear a voice, and watch a person make choices. Second, Lou and Yuan (2019) found that perceived creator credibility (trustworthiness, expertise, attractiveness) directly increases consumer trust in branded content; creator visibility is one of the strongest credibility signals. Industry data from the Influencer Marketing Hub annual benchmarks consistently puts face-on-camera Reels and TikToks at higher engagement than pure screen-recordings, though the gap varies a lot by niche.

The caveat

Faceless has real strengths. When the demonstration is self-explanatory - a tool doing the thing, a satisfying B-roll, a screen-recording that compresses a 20-minute task into 30 seconds - the product replaces the personality. Faceless also scales: lower production cost per post, no on-camera nerves, easier to outsource. The cost is parasocial trust, which means lower conversion per view but often higher reach.

When each path works

UGC fits when face-on-camera is your credibility asset (you, your craft, your daily reality), when trust matters more than reach, and when you'd naturally say "I personally use this". Faceless fits when the demonstration carries itself (product on screen does the work), when you want to scale output, when on-camera isn't an option, or when you post under a brand persona rather than a personal one.

3. Creator types - which path fits you

Find your row. For knitting/crochet, two rails matter - sub conversion AND Awin shop attach. Designers and dyers convert weak on subs but strong on shop. Numbers are sub-only; Awin is additive.

Creator type	Primary path	Best hook angles	Realistic conversion
Pattern designer (independent)	UGC strong	"What's in my designer's stash"; pattern-design process with stash; "the app I use to plan my designs"	3-5% on subs, very high Awin attach
KnittingTok / CrochetTok creator	UGC + Faceless mix	Yarn label scan demo; stash-tour with app overlay; project-match reveal; "I finally know what I have"	2-4% on subs, moderate Awin
Indie yarn dyer	UGC	"Dyeing a colourway, here's how my customers track it"; stash-organisation showcase	2-4% on subs, very high Awin attach
Stash-tour / fibre-festival recap	Faceless or UGC mix	Stash tour with app-scan overlay; festival haul with label-scan reel; pattern-match-from-haul demo	1.5-3% on subs, very high Awin
Finished-project carousel creator	Faceless	FO carousel with app's yardage data in caption; project log time-lapse; stash-to-FO journey	1-2% on subs, moderate Awin
Granny-square / starter content	UGC + Faceless mix	"Granny square but make it stash-aware"; beginner stash setup; "my first scan and what it found"	1.5-3% on subs (beginner audience)

4. UGC strategy (you on camera)

Who this fits

You with your yarn. Designer at your desk with WIPs. Dyer in your studio. Stash-tour host with your physical shelves. Audience tells within 2 seconds whether you actually own and use the yarn. Sokolova and Kefi (2020) applies double-strength to craft - knitters follow makers.

Hook examples that work

- "What's in my designer's stash and what the AI thinks I should knit" - desk shot, scanning labels.
- "I scanned my entire stash and here's what I found" - emotional payoff.
- "My fibre-festival haul, every label scanned" - haul reel.
- "How I plan my next design" - designer process vlog.
- "As an indie dyer, this is what I tell my customers to use" - authority play.
- "What I learned scanning 200 labels" - pattern-discovery.
- "My stash before and after the AI" - before/after reveal.
- "Three months of using this - honest review" - straight to camera.

Format templates

- Designer desk vlog 60s.
- Talking head 30s.
- Haul recap.
- Dyer authority piece.
- Stash-tour with app overlay.
- Project storyline: scan -> pattern -> FO arc.

Do / Don't

- Do: use your real stash.
- Do: name specific yarns.
- Do: link in caption AND IG bio.
- Don't: oversell the AI.
- Don't: skip the Awin angle for designer/dyer audiences.
- Don't: unfocused trending sounds.

5. Faceless strategy (screen-rec, voiceover, B-roll)

Who this fits

Hands-on-yarn POV. Stash flat-lay. Finished-project carousel. Top-down craft shots. Knot Stitch-style hands-only YouTube. Fibre-arts is unusually faceless-friendly because the work IS the demonstration.

Hook examples that work

- Top-down stash scan demo.
- Hands-on-yarn stash organisation time-lapse.
- Silent FO carousel.
- Voiceover-only walkthrough: hands working.
- ASMR-adjacent: yarn-handling sounds + scanning beats.
- Stop-motion: yarn balls organising into app categories.
- Tutorial carousel: "How to use the AI label scan".
- Time-lapse: 60 seconds from "shelves of unknown yarn" to "organised stash".

Format templates

- Hands-on-yarn POV 60s.
- Top-down phone screen-rec 30s.
- Voiceover-only tutorial.
- Tutorial carousel: 6 IG slides.
- ASMR-adjacent.
- Stash-tour time-lapse.

Do / Don't

- Do: real yarn only.
- Do: caption every step.
- Do: keep ambient sound (yarn rustle, needle clicks).
- Do: link in caption + bio.
- Don't: fake-enthusiastic voiceover.
- Don't: skip the FO logbook moment in finished-project carousels.

6. Audience fit

Works well for

- Independent pattern designers (very high engagement + Awin attach).
- KnittingTok / CrochetTok creators.
- Indie yarn dyers (trusted by stash collectors).
- Stash-tour reel makers.
- Finished-project carousel creators.
- Granny-square / beginner-friendly creators.

Works poorly for

- General DIY / craft accounts without yarn focus.
- Aesthetic-only fibre content (slow-motion yarn-petting without actual knitting).
- Non-knitting handicraft (sewing, embroidery - wrong stash app).

7. Posting cadence + best times

Craft: Sunday morning 8-11h + Wednesday evening 19-21h local. KnittingTok: weekend mornings peak. Pattern designers post in arcs (design -> process -> sample -> release). 1 reel per week. Stories during fibre festivals or pattern drops drive conversion.

8. Conversion math (why this pays)

50% rev share on Premium (24 months) + Awin commission share on every yarn purchase from referred users (24 months). Premium 4.99 USD/m or 29.99 USD/y. Independent pattern designer (40k IG): 18,000 views x 2.5% CTR = 450 clicks, 35% install = 158 installs, 6% Premium = 9 subs (~135 USD/yr) + Awin attach: 30% become yarn buyers, 47 buyers x 3 baskets/yr x ~5 USD share = ~700 USD/yr Awin. Total ~835 USD/yr from one reel. CrochetTok mid-tier (100k TT): 50,000 views x 1.5% CTR = 750 clicks, 30% install = 225 installs, 4% Premium = 9 subs (~135 USD) + Awin: 25% buyer-rate = 56 x 2 x 4 USD = ~450 USD. Total ~585 USD/yr. Indie yarn dyer (10k IG carousel): 4,000 views x 4% CTR = 160 clicks, 50% install = 80 installs, 8% Premium = 6 subs (~90 USD) + Awin very high (audience is buyers already), 60 x 5 x 5 USD = ~1,500 USD/yr. Total ~1,590 USD/yr - designers and dyers have the highest LTV.

9. Tracking summary (full walkthrough in the Extended Brief)

Your link [yarnstash.app/i/\[yourhandle\]](https://yarnstash.app/i/[yourhandle]) works on every platform. Android uses Google install-referrer (deterministic). iOS warm uses Universal Link (deterministic). iOS cold (~99% of creator traffic) uses our DIY signed-token clipboard deferred-deeplink, live-verified, no Branch.io. RevenueCat fires on Premium purchase and credits 50% of net revenue to your handle for 24 months from each user's first paid month. 30-day refund holdback before payout becomes claimable. Full walkthrough is in the Extended Brief PDF.

10. Onboarding (5 minutes)

- Click the personal link from Mail 2 (valid 7 days).
- Land on [yarnstash.app/affiliate/\[your-token\]](https://yarnstash.app/affiliate/[your-token]).
- Fill in: handle, Wise payout details, country (for tax docs), billing address.
- Get your personal tracking link by mail + dashboard unlock.
- Free Lifetime Premium activation. No posting obligation, no expiry.

11. Dashboard (what you see)

- Live at getklar.org/dashboard (magic-link login).
- Per day / week / month: clicks, installs split (Android / iOS warm / iOS cold), active Premium subs in your bucket.
- Claimable EUR + paid EUR + next payout date.
- Refund-holdback pipeline + per-app earnings funnel.

12. Brand assets (download)

Logo, app screenshots, label-scan demo footage, stash-tour B-roll, colour palette and ready-made captions: getklar.org/i/yarnstash/brand-assets.

13. FAQ

How does the Awin commission work?

User clicks your link, installs, buys yarn in-app via Knit Picks or Minerva, Awin fires a postback. Klar earns ~5-10% commission on basket; your share is a portion. 24-month attribution window.

Out-of-app yarn purchase?

Doesn't attribute - only in-app via the Awin-deep-linked shop rail. Feature not bug: clean attribution beats fuzzy 'maybe' tracking.

Pattern previews?

Yes, but Ravelry has rules about derivative content. Always link your own designs back to Ravelry as primary source.

Non-yarn fibre crafts?

Not a fit - different app. We're building specifically for yarn-based crafts.

Flat fee?

Designer and dyer audiences command higher rates because of niche-trust. Mid-tier 150-500 USD, macros 500-1500 USD. Rev share + Awin on top.

Disclosure?

Yes. Rev-share + Awin commission = paid recommendation. Craft audiences are unforgiving of hidden affiliate links.

14. One last thing

Honest read: My Yarn Stash fits creators who actually knit or crochet. Designers, dyers, KnittingTok, CrochetTok, stash-tour, FO carousels - all good fits. Aesthetic-only fibre content where nobody actually knits is not a fit. The Awin rail makes designer and dyer creators particularly lucrative because their audience already buys yarn constantly. Reply to Mail 2 - yes, no, or 'let's see if my audience buys yarn'.
