

MyLoo

Privacy-first digestion tracker with AI Bristol classification and 30-day clinic export.

What it is

MyLoo is a digestion and stool tracker for iOS (Android launch on hold - Google Health Policy 2026). Photo of the sample, Claude Vision AI classifies on the Bristol Stool Scale 1-7, plus volume / texture / blood / mucus flags. Privacy-first: photos are NOT stored, only the structured result lives in the timeline. Symptom tags (bloating, cramps, urgency, pain). 30-day PDF export for GI appointment.

Who it is for

Adults with IBS, IBD, gut sensitivities, food intolerances, post-surgical follow-up. Parents tracking toddler health. Chronic-condition patients.

Key features

- Photo-to-Bristol AI classification: Vision returns Bristol 1-7 + flags.
- Privacy-first photo handling: not persisted on Klar infrastructure.
- Symptom tags timeline: bloating, cramps, urgency, pain level.
- 30-day clinic PDF export for GI appointment.
- Discreet clinical UI: deliberately calm, not wellness-influencer aesthetic.

Business model

- Single revenue stream: recurring Premium subscription.
- Pricing: 4.99 USD / month or 29.99 USD / year.
- Free tier: manual Bristol entry + tags, timeline, manual PDF export.
- Premium unlocks: AI photo classification, email-inbound scanning, extended clinic export.
- Platform: iOS only. Android paused - Google Health Policy requires registered org + D-U-N-S.

Affiliate compensation

- 50% of net Premium subscription revenue for 24 months from each attributed user's first paid month.
- 30-day refund holdback before payout becomes claimable (Apple / Google refund window).
- 50 EUR minimum payout, monthly, via Wise.
- Free Lifetime Premium for onboarded affiliates (no posting obligation).
- Per-handle dashboard with live click / install / sub / earning split, no agency layer.

How tracking works (one paragraph)

Your link [myloo.org/i/\[handle\]](https://myloo.org/i/[handle]) works on every platform. iOS warm uses Universal Links. iOS cold (~99% of creator traffic, iOS-only) uses our signed-token clipboard deferred-deeplink - live-verified, no Branch.io. RevenueCat fires on Premium purchase, 50% of net revenue credited to your handle for 24 months. Android attribution activates via Google install-referrer once Android relaunches.

For the full walkthrough, the Google Health Policy context for Android pause, and how the privacy-first photo handling actually works, see the Extended Brief PDF.
