

Trubel

QR-code album that scans guests' camera rolls automatically after the event.

What it is

Trubel is an iOS + Android photo-album app with QR-code magic. You host a hangout (birthday, bachelorette, housewarming, flatshare party), generate a QR card, every guest scans it and just takes photos normally. After the event the app scans guests' camera rolls automatically within the time window (optional GPS radius) and collects every photo into one shared album. Optional: any host or guest can buy a 4K download of the full album as a one-time consumable.

Who it is for

Gen-Z friend-group leaders, party hosts, bachelorette and birthday planners, festival groups, study-abroad cohorts. Audience skews 18-28, heavily TikTok-leaning, iPhone-dominant (~80%).

Key features

- QR-card hosting: per-event QR card, guests scan once on arrival, no app account needed.
- Automatic camera-roll scan: app pulls every photo from guests' rolls within time window (+ optional GPS radius).
- Shared album per event: every member sees photos as they land, comment + react inline.
- World-Map public pin (Premium): discovery pin for friends-of-friends.
- 4K full-album download (one-time, 1.99 USD): print resolution.

Business model

- Two revenue streams: recurring Premium sub + one-time 4K-album consumable.
- Premium pricing: ~5 EUR / month or ~30 EUR / year.
- Free tier: 3 active albums, 20 photos per album, 4 members per album.
- Premium unlocks: unlimited albums, photos, members + World-Map pin.
- Standalone consumable: 4K album 1.99 USD per album.

Affiliate compensation

- 50% of net Premium subscription revenue for 24 months from each attributed user's first paid month.
- 30-day refund holdback before payout becomes claimable (Apple / Google refund window).
- 50 EUR minimum payout, monthly, via Wise.
- Free Lifetime Premium for onboarded affiliates (no posting obligation).
- Per-handle dashboard with live click / install / sub / earning split, no agency layer.

How tracking works (one paragraph)

Your link `trubel.space/i/[handle]` works on every platform. Android attribution deterministic via install-referrer. iOS warm uses Universal Links. iOS cold (~99% of creator traffic) uses our own signed-token clipboard deferred-deeplink - live-verified, no Branch.io. RevenueCat fires for BOTH Premium subs AND the 4K-album consumable - 50% of net revenue credited to your handle, sub runs 24 months, consumables credit immediately.

For the full walkthrough plus how the two-stream RC integration handles sub + consumable, see the Extended Brief PDF in this folder.
