

My Yarn Stash

Photo of the yarn label, AI auto-fills everything, matches to Ravelry patterns from your stash. Plus shop commissions.

What it is

My Yarn Stash is an iOS + Android app for hobby knitters and crocheters. Photograph the yarn label, AI extracts material, yardage, needle, manufacturer and colour. The app matches Ravelry patterns the user can knit from their current stash. Plus: project tracking, FO logbook, pattern-match history, group sharing for knit circles. Two revenue rails: 50% on Premium subs AND a share of Awin shop commissions on in-app yarn purchases.

Who it is for

Hobby knitters, crocheters, fibre artists. Audience skews ~90% female, high purchasing power (yarn re-bought every 3-6 weeks), EU + US + UK + AU.

Key features

- Vision-AI label scan: material, yardage, needle, manufacturer, colourway, weight from one photo.
- Pattern matching: "patterns I can knit right now from my stash".
- Project tracking + FO logbook with photo.
- Group sharing for knit circles.
- Awin in-app shop rail: deep-linked Knit Picks + Minerva purchases.

Business model

- Two revenue streams: recurring Premium sub + Awin shop commission share.
- Premium pricing: 4.99 USD / month or 29.99 USD / year.
- Free tier: 30 yarn items, 1 group up to 5 members, manual + photo scan, pattern-match search.
- Premium unlocks: unlimited stash, unlimited groups, AI pattern-match, advanced tracking.
- Shop rail: ~5-10% Awin commission per basket; affiliate gets a share for 24 months.

Affiliate compensation

- 50% of net Premium subscription revenue for 24 months from each attributed user's first paid month.
- 30-day refund holdback before payout becomes claimable (Apple / Google refund window).
- 50 EUR minimum payout, monthly, via Wise.
- Free Lifetime Premium for onboarded affiliates (no posting obligation).
- Per-handle dashboard with live click / install / sub / earning split, no agency layer.

How tracking works (one paragraph)

Your link `yarnstash.app/i/[handle]` works on every platform. Android attribution deterministic via Google's install-referrer. iOS warm uses Universal Links. iOS cold (~99% of creator traffic) uses our own signed-token clipboard deferred-deeplink - live-verified, no Branch.io. RevenueCat fires on Premium purchase, 50% credited for 24 months. Awin commissions on yarn purchases from referred users are also tracked and credited.

For the full attribution walkthrough plus how the Awin shop-commission rail attributes to the same handle as the Premium sub, see the Extended Brief PDF.
